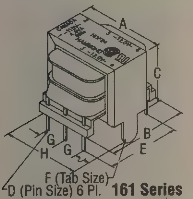
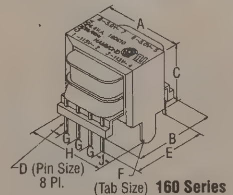
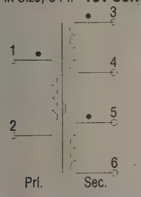
P. C. Board Mount (Vertical) Power Transformers — *NEW* —

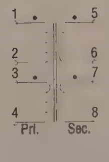


161 Series



160 Series





Vertical mount (for reduced board footprint), split bobbin power transformers. No electrostatic shield required due to low primary to secondary coupling. **Single Primary (161 Series)**: 115 V (60 Hz). **Dual Primary (160 Series)**: 115/230 V (50/60 Hz). Hi-pot tested at 2,500 V RMS. Both series are UL recognized and CSA certified.

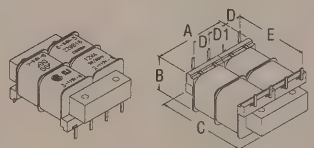
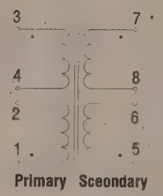
P.C. Board Mount (Horizontal Low Profile) — Power Transformers





Low profile, P.C. board mount, power transformers. No electrostatic shield required due to low primary to secondary coupling. **Dual Primary**: 115/230 V (50/60 Hz). Split winding design, balanced windings for magnetic radiation. Hi-pot tested at 1,750 V RMS. UL recognized and CSA certified.

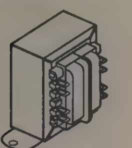
Power Transformers — World Series

Chassis Mount



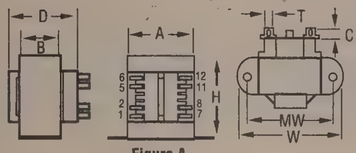


Figure A

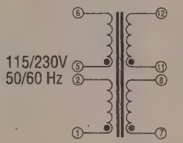

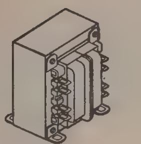

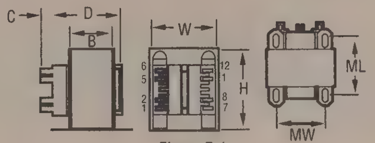

Figure B

MAGNETEK Chassis Mount World Series transformers are designed to meet U.S. and international standards including CSA, IEC, VDE and UL requirements. The transformers consist of a dual bobbin design positioned inside an insulating shroud, and constructed with UL approved high temperature material. This design eliminates the need for electrostatic shielding since there is minimal capacitance between coils when using a dual bobbin configuration. The primary and secondary are both electrically isolated from each other, and from the core itself. Chassis Mount World Series transformers are available in sizes ranging from 25 VA to 175 VA, and are equipped with convenient "quick connect" terminations. **Technical Notes:** 1. Hi pot tested at 4000 RMS. 2. Both primary and secondary coils may be connected as either series or parallel, but both must be used simultaneously. **Specifications. Primary:** 115/230 V, 50/60 Hz.

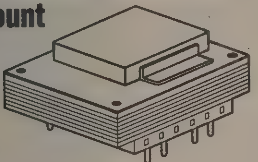
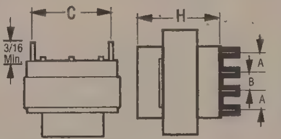
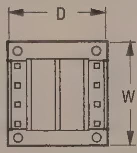
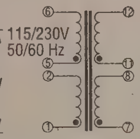
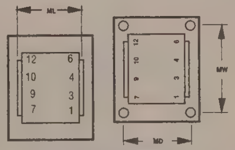
PC Mount











MAGNETEK PC Mount World Series transformers incorporate a dual bobbin construction with an insulating shroud, both made of a high temperature material that exceeds UL flammability requirements. These units are designed with very high isolation between the primary and secondary, and also, between each winding and the core. Since the dual bobbin construction effectively reduces capacitance, electrostatic shielding is not required. PC Mount transformers are available with ratings from 2.5 VA to 56.0 VA and have dimensionally accurate pin placement for through hole PC board mounting. All World Series transformers meet U.S. and international standards including CSA, IEC, VDE and UL requirements, and, therefore, have universal application. **Technical Notes:** 1. Hi pot tested at 4000 RMS. 2. Both primary and secondary coils may be connected as either series or parallel, but both must be used simultaneously. **Specifications. Primary:** 115/230 V, 50/60 Hz. **Variances:** 2.5 to 56.0.

Flat Pack

The Triad Flat Pack power transformer from MagneTek is designed to meet the needs of low clearance PC board and solid state power designs. These units can also be used for control and instrumentation applications. Voltages and currents were chosen for widely used power applications. It is offered in a dual primary and dual secondary configuration. **Specifications. Primary:** 115/230V, 50/60 Hz. **Low Profile:** allows 3/4" card spacing for 2.5VA units, allows 1" card spacing for 6VA units, allows 1 1/4" card spacing for 12VA units.

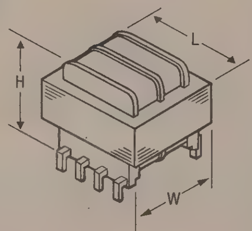
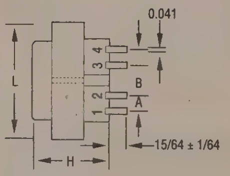
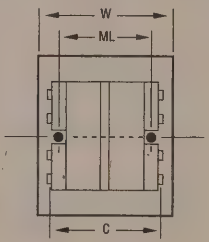
Split Pack

Class B
UL Recognized







The Triad Split Pack split bobbin transformer from MagneTek is an extremely versatile tool for PC board applications. Split Pack transformers are nonconcentrically wound - with primaries and secondaries side by side. Unlike the secondary-on-top-of primary designs of standard PC board transformers, the split bobbin winding and low capacitive coupling eliminate costly electrostatic shielding. It is offered in a dual secondary configuration with either single or dual primaries.

Figure B

TRIAD power transformers from MagneTek are offered in a wide selection of plug-in types to meet the needs of PC board and solid state power supply designs. These transformers can satisfy power as well as control and instrumentation applications. The transformers are available in single or dual primary and dual center tapped secondary configurations. **Specifications. Primary:** 115/230 V, 50/60 Hz.

Dual Primary, Dual Secondaries

TRIAD power transformers from MagneTek are offered in a wide selection of plug-in types to meet the needs of PC board and solid state power supply designs. These transformers can satisfy power as well as control and instrumentation applications. The transformers are available in single or dual primary and dual center tapped secondary configurations. **Specifications. Primary:** 115 V, 50/60 Hz.

Wall Plug-Ins

► UL/CSA

MAGNETEK'S prepackaged wall plug-in power supplies decrease product design time. These plug-in power sources eliminate the need for internal power supply cooling devices, thereby reducing the noise level, size and weight of the end product. In addition, these compact power sources keep heat away form sensitive circuits, and supply a safer lower power output to the end product. Wall plug-in power sources are completely enclosed to prevent tampering. And since they carry many required agency listings, their use aids in gaining agency approvals. Offered in a wide range of popular voltages, the plug-in power sources are available in AC-DC unregulated models with generous foot cord lengths.

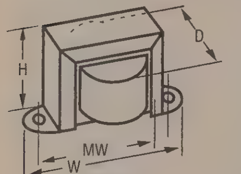
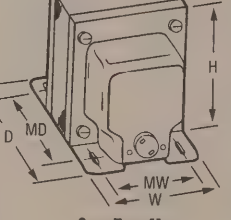
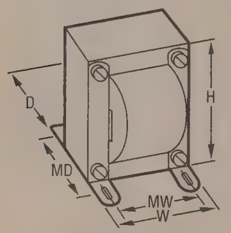
Autotransformers and Transformers



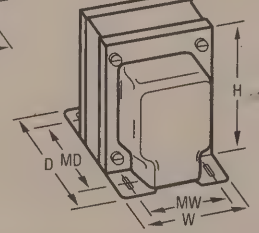
Case Type X



Case Type M



Case Type U



Case Type A

Step-Down Autotransformers. TRIAD autotransformers are single winding transformers in which the primary coil is a fraction of the entire winding for voltage step-up or the secondary coil is a fraction of the entire winding for voltage step-down. (See Technical Notes for an equivalent circuit diagram). In ordinary double wound power transformers, the primary and secondary are isolated and all the power is transferred by induction. In autotransformers, part of the power is transferred conductively through the windings. TRIAD autotransformers come in a variety of configurations, case types and output watts (VA) ratings in excess of 2000 watts. A universal isolation/autotransformer/voltage control model is available with up to a 4000 output watts rating when operated as an autotransformer.

Isolation. Isolation transformers are power transformers for isolating equipment from direct connection to the power line. They are offered in a variety of voltage and case types. TRIAD isolation transformers are also offered in a hospital type (designated with an MD suffix) which are designed and constructed to meet the low leakage current requirements for today's medical equipment. The transformers are constructed with nonconcentrically precision-wound coils. The primary and secondary are precision wound on separate arbors, then assembled on a laminate core side by side separated by insulation. This prevents electrical connection, under normal or overload conditions, between the primary and secondary windings. These hospital type units are offered with a resettable circuit breaker, providing protection from overload and short circuit conditions.

***Mounting Hole Sizes:** (3)=3/8 × 3/16"; (1)=3/16". †Has 3-wire plug, cord and socket. ‡Split winding. •Circuit Breaker.

Technical Notes: 1. Leakage current from primary to secondary is rated at less than 50 micro-amps and is typically measured at less than 10 micro-amps. 2. Line cord, plug and receptacle are U.L. listed and verified to meet federal specifications. 3. Connections are by leads, plugs and sockets. 4. Hi-pot tested at 1500 VRMS. 5. All units have static shields, except those marked with an asterisk.

Telephone Coupling and Printed Circuit Audio Transformers

Telephone Coupling Transformers. TRIAD telephone coupling transformers from MagneTek are designed for use in work areas where several telephones are connected to a single incoming — outgoing line. The TY Series is adaptable for hybrid, bridging or coupling applications. These coupling transformers provide a correct means of impedance matching and balancing through close coupling and isolation — all parameters must be considered so that existing lines are not degraded. **Specifications. Frequency Response:** 300-3,500 Hz ±0.5 dB. **Longitudinal Balance:** 45 dB min. **Return Loss:** 26 dB min. **Distortion:** 0.5% max. **Impedance Matching:** ±10% over the frequency range. **Power Level:** –45 dBm to +7 dBm. Complies with FCC Rules Part 68.

Plug-In Printed Circuit Audio Transformers. MagneTek produces a wide assortment of TRIAD audio transformers for use in printed circuit designs. These transformers fill a broad application spectrum in the audio industry. TRIAD audio printed circuit transformers are used in line matching, telephone coupling, pulse trigger, driver, interstage, output, isolation and input applications. **Specifications. Frequency Response Ranges:** 200-15,000 Hz. **Impedance Matching:** 10% over frequency range.

Power Transformers

MagneTek offers a full choice of TRIAD power supply transformers for direct use or in transformer, rectifier, or filter circuits. Other available secondary voltages include control, filament and low level signaling in standard values. The transformers are single primary with single and multiple secondaries in standard size and weight configurations.

Case Type U

Chassis Mount — Control Power Transformers

TRIAD control transformers from MagneTek supply secondary voltages that are commonly utilized in various electronic, electro-magnetic and electrical control conditions. These include such applications as use with relays, solenoids, small motors, speed changers, pumps, heating elements, control valves for fluids and gases, fans and blowers, electronic tubes, automatic assembly equipment, recording devices, elevators, door openers, and low voltage lamps. **Specifications. Primary:** 115/230 VAC. 50/60 Hz. **VA Range:** 12 to 192. **Secondary:** 6/12/24 VAC. **Connections:** Lugs.

Audio Transformers

MIL-T-27E

TRIAD high reliability audio transformers from MagneTek provide the durability and precision required in today's demanding designs. These transformers are available for a wide variety of applications. The line of Red Spec audio transformers is designed and constructed to meet the rigid requirements of MIL-T-27E. These transformers feature an epoxy molded case, gold plated leads and exceptional operation from 300 Hz to 150 kHz. **Specifications. Frequency Response Ranges:** 300 Hz to 150 kHz.

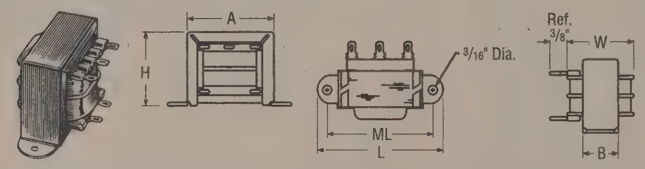
Single and Dual Primary Transformers

UL



Quick Pack Series small power transformers offer a significant size and weight reduction for a given VA rating. Features quick-connected or solder terminals. Available in 6 sizes for a wide variety of applications. Bobbin wound for small size. Split bobbin non-concentric winding for a higher HiPot testing (2500 V rather than 1500 V); also eliminates need for electrostatic shielding. Class B insulation for maximum total temperature of 130°C continuous. Available as single 115 V or dual 115/230 V primary, rated 50/60 Hz. UL Recognized. Our formal quality assurance system verifies that your specifications are consistently met or surpassed. We maintain accurate statistical process controls on our product and test all incoming components. Continued inspection of wire, core, insulation and other components, combined with our supplier quality assurance program, virtually eliminates imperfections. **Note:** Terminals to be quick-connect (1.87) or solder lug terminals. **Dielectric Strength:** 2500 V.

Common Mode and Current Sense Inductors, and Smoothing Filter Chokes

Common Mode Inductors

- ► Hi-Pot Tested at 2,500 VRMS
- ► DC Resistance at 20°C ±10%
- ► Inductances are Minimum Measured at 10 Gauss
- ► Current Ratings for Approximately 40°C Temperature Rise

Highly dependable TRIAD common mode EMI suppression inductors manufactured by MagneTek are used in various types of power supplies to eliminate noise common to all lines. These units also provide effective differential mode filtering. Meeting VDE, IEC, UL, and CSA requirements, they minimize AC line transmitted interference often created by high frequency switching power supplies. Normally placed close to the input power source, these compact inductors are constructed with UL rated 130°C materials.

Current Sense Inductors

- ► Derate ET Product by 32% for 50 kHz, 52% for 100kHz and 50% for Unidirectional Operation
- ► Rated Primary Current Renders Approximately 40°C Temperature Rise
- ► CST-206 Models Have Maximum Recommended Terminating Resistance of 1 Ohm Per Turn

Designed for switching power supply applications, TRIAD current sense inductors from MagneTek are used to detect the current passing through a conductor. These inductors are very reliable and operate effectively over the frequency range of 20-200 kHz. They are constructed of UL rated 130°C materials. Both models are available with a center tap option.

Inductors — Smoothing Filter Chokes

TRIAD chokes are manufactured in a wide variety of inductance values and physical configurations. MagneTek produces two styles of TRIAD filter reactors (chokes) — smoothing and swinging. Smoothing chokes are power supply filter chokes having a core with an air gap which prevents saturation at maximum direct current. Swinging chokes have cores with little or no air gap, therefore, exhibiting high inductance at low current and low inductance at high current. This inductance, which swings under conditions of varying load current, permits use of a high resistance bleeder resistor. Swinging chokes improve regulation of high voltage power supplies and prevent DC voltage from rising to the maximum peak AC rectifier input by providing a swinging input reactance. **Specifications. Inductance Ranges:** .005 to 50 H. **DC Current Ranges:** 10 Ma to 22.5 A. **Resistance Ranges:** .06 to 3500 ohms.

Rod Core Inductors

- ► Rated Current 10 Amps per Pin Max
- ► Rated Current Renders @ 40°C Temp. Rise

TRIAD high current rod core inductors from MagneTek provide cost effective energy storage. By conditioning the output signal, the inductor smooths out the current waveform to provide a more stable current. These low cost inductors are designed to be compatible with automated P. C. B. installation.

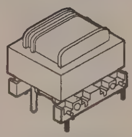
Low Frequency CSE187-L



Designed to monitor current in low frequency applications. This MagneTek part may be used to monitor current from .1 to 30 amperes at frequencies from 50 Hz to 400 Hz. **Technical Notes. Turns Ratio:** Primary to sense 1:500. **Suggested Burden Resistor:** 60 ohms. **Typical Output:** 110 mV/amp. **Primary DCR:** 250 µohms max. **Sense DCR:** 21 ohms max. Constructed with UL recognized materials (Class B, 130°C).

Toroidal Filter Inductors

- ► Nominal Inductance Values are Typically 10% Higher Than Minimum Rating
- ► Biased Inductance Measured at Rated DC Amps
- ► Operation at Rated Current Yields @ 40°C Rise Over 20°C Ambient

TRIAD toroidal filter inductors from MagneTek are specially designed to minimize transients. These devices store energy, and therefore, condition the output signal by leveling out the current waveform providing a more stable current supply. Generally used in high frequency circuits, our standardized design provides an economical solution for use in differential mode applications or as an output filter inductor.

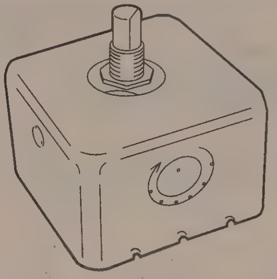
PCA/PCD Series



Ohmitrol Power and Motor Speed Controls are solid state units which provide an infinitely smooth power control over their entire voltage range. An integral internal trimmer allows customization of the control voltage to be set to a specific starting voltage by a simple turn of a screwdriver. The on-off switch is actuated at the counterclockwise end of the control knob rotation. The recommended optional knob is 5150 (sold separately). The PCA series has an AC output that can be used for applications to control heaters (both resistive and infrared) and some universal and shaded pole motors. The PCD with a DC output can be used to control shunt and series wound, universal, compound and permanent magnet motors, magnetic clutches, brakes, etc. The PCD models have two DC outputs, one output from an AC source is rectified DC at approximately full line voltage, the other output is variable DC. The DC units have rear terminals which accept quick-connectors. On all models, 500 mA is the minimum for proper operation. For use of either control under full power output conditions, the face of the control must be in contact with a metal panel. For optimum heat dissipation a thermal-conducting compound must be applied to the face of the power control before mounting.

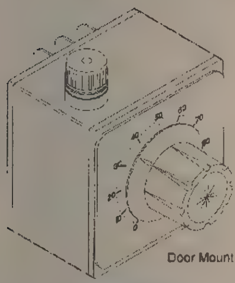
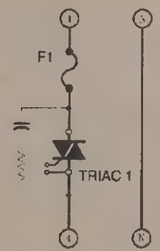
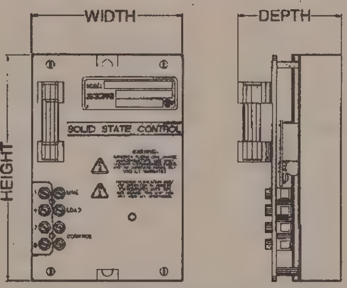
SCA/SCE Series



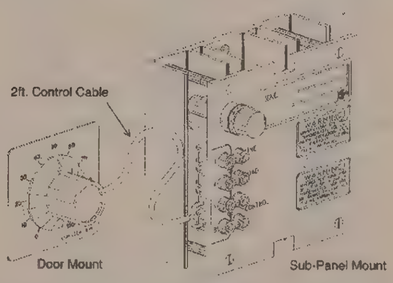
SCE SERIES



POWER CIRCUIT SCHEMATIC



OPEN CHASSIS DIMENSIONS



SCA SERIES

Infinitely variable voltage power controls for AC voltage to constant resistance loads and shaded pole motors. All solid-state construction with short circuit protection. Integral heatsink chassis means no thermal derating. Applications include replacing variable transformers, mercury relays, saturable core reactors, electromechanical contactors, for electric heater controls, light dimming, hot-wire cutting, heat sealing and packaging plastic molding and extruding and food preparation equipment. Power Triacs replace contacts and brushes to control electric power without moving parts. When operated within their stated ratings for current, voltage, and temperature, they have an extremely long life expectancy rating. The power circuit is a power Triac with parallel R-C circuit for dv/dt protection and current-clamping 2 millisecond fuse for short-circuit protection. The R-C network control circuit with variable-resistance potentiometer adjusts firing capacitor into bilateral diode connected to power Triac gate for stable full-range control. **Output Voltage:** 0-95% of input. **Overall Efficiency:** 99%. Manual input control via variable potentiometer.

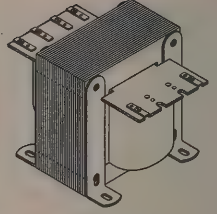
SBE Series Industrial Control Transformers

- ► Cooler Operating Temperature (50° to 55° C)
- ► 10-20% More VA Capacity
- ► Superior Voltage Regulation
- ► UL Listed and CSA Certified
- ► Rated for 50 or 60 Hz Use
- ► Epoxy Encapsulated Design
- ► Quantity Pricing Always Available



SBE transformers are encapsulated to permit more efficient heat dissipation for cooler operation and higher VA capacity. The higher rated capacity provides you the opportunity of meeting high inrush electromagnetic load requirements for either 50 or 60 Hz applications, with smaller transformers and less cost per VA.

SBE-3PB Industrial Control Transformers

- ► Simplifies Compliance with NEC and UL Specification 508 Fusing Requirements
- ► Eliminates the Time and Cost of Buying Separate Fuse Blocks
- ► Saves Panel Space with Molded-in Fuse Holders Mounted on the Top Surface
- ► Exceeds NEMA, ANSI, NBMTA, JIC and Automotive Electrical Requirements
- ► Rated for 50 or 60 Hz use
- ► UL Listed and CSA Certified

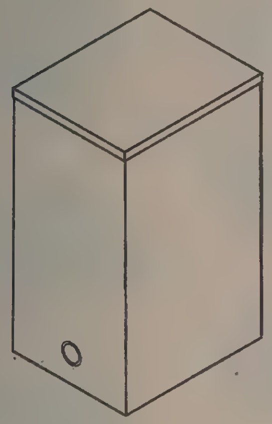
General Purpose and Buck Boost Transformers

General Purpose Electrical Transformers



- ► Free Shielding
- ► Fast, Easy Installation
- ► UL-3R Enclosures
- ► Highly Versatile

Hevi-Duty General Purpose Transformers are the industry's workhorses. Typical applications include shopping centers, apartment buildings, high rise buildings, institutional buildings, hospitals, office buildings, industrial plants,

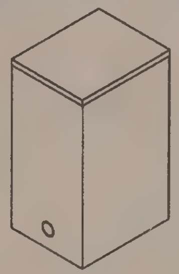
Buck-Boost Transformers



- ► Low Cost
- ► UL-3R Listed
- ► Ideal for Low Voltage Lighting and Control Applications
- ► Compact Size
- ► Dual Voltage Primary and Dual Voltage Secondary

Hevi-Duty buck-boost transformers are the ideal solution for economically changing line voltage by small amounts. Buck-Boost transformers are small, single phase, dry-type distribution transformers, designed and shipped as insulating/isolating transformers. The most common use is to buck (lower) or boost (raise) the supply voltage a small amount, usually ±5 to 2000%.

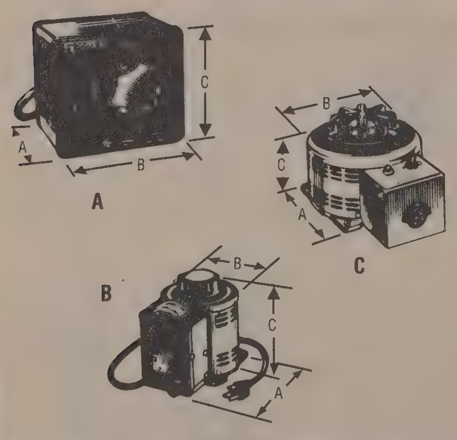
Motorized Units

Motorized Units are available starting with the 501 series. Units can be open or enclosed and supplied in larger sizes. Contact Allied for price and availability. For enclosed microprocessor controlled full range voltage controllers refer to page 503.



Portable Models

Prefix "3PN" indicates 3-prong cord, plug and receptacle; "V" suffix indicates voltmeter. "A" suffix indicates ammeter. All models are housed in a rugged steel enclosure and supplied with input linecord and plug with matching receptacle, on-off switch, fuse, pilot light. Available for 120 Volt AC or 240 Volt AC input.

Fully Enclosed Variable Voltage Controls

All holes have been eliminated to prevent entry of small items. The front panel is recessed to help minimize accidental shut-off or unintentional readjustment. Designed to minimize voltage variation from no-load current conditions, thus reducing the need to readjust the output voltage as the load current changes. Much higher currents, up to 10 times the specified rating, can be drawn for a short period of time for surge current applications. These controls can operate up to 2000 Hz with virtually no loss in output current.

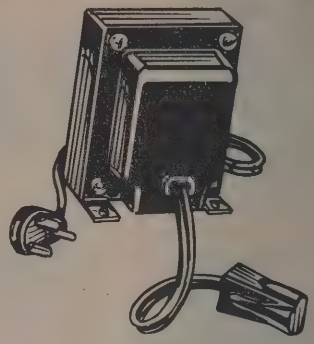
Auto Transformers



All of these items have Class "A" insulation and are rated to have a maximum operating temperature limit of 105°C. These units may be used with rectifiers but the form factor should be observed for various combinations of rectifier circuits and types of load following the rectifier.

These items are made with our standard N.E.M.A. plugs and receptacles, primarily for use in this country. However, if used overseas where different types of plugs are necessary, an international adapter plug below can be used or our plug can be removed and a foreign plug attached to the end of the line cord.

Step-Down Auto-Transformers. 230/115 volts, 50/60 Hz. May be operated from a 400 Hz source with no change in output rating. Case and core internally connected to third conductor of NEMA standard cord and receptacle for safety. **RMS Test Voltage:** 1500.

International Adapter Plugs

A new line of grounding adapters, ideal for use on electrical/electronic equipment exported to countries that have standardized on the CEE-7 SCHUKO outlet configuration. The use of these adapters reduces the need for expensive and difficult-to-obtain foreign type power cords and cord sets, as they provide a fast, easy means of connecting equipment to European outlets.

American to European - Fig. A

Allows interface from NEMA 6-15P plugs to CEE-7 SCHUKO grounding outlets.

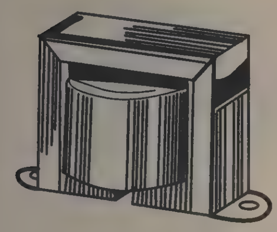
Rectifier, Control and Filament Types



With single secondary: all primaries 50/60 Hz (may be operated from a 400 Hz source with no change in output ranges). Useful in all power and control applications such as relays, pilot lamps, small motors, pumps, speed changers and many other mechanical and electrical devices. Many units are center tapped for most efficient and economical rectification application, enabling the designer broader selection and versatility. All types have lead wire terminations and 117 volt primary except P-8551 which is 115 volts. Twice allowable RMS working voltage plus 1000 volts.

Isolation Transformers

Straight Isolation (Three Conductor Line Cord and Receptacle)

115/115 volts, 50/60 Hz (may be operated from a 400 Hz source with no change in output ratings). Case and core and electrostatic shield internally connected to third conductor of NEMA standard cord and receptacle for safety. **RMS Test Voltage:** 1500.

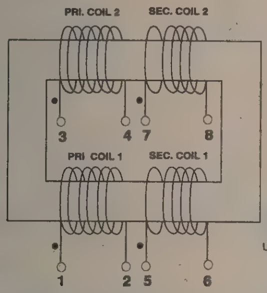
Explanation of Low Boy Interconnections. Because of the toroidal effect, two *identical* coils are connected in series or parallel, but one of the coils must be connected in reverse in order to get correct polarity and voltage.



UL Recognized

The Low-Boy Power Transformer is designed to surpass competitive market offerings in cost, size and versatility to the designer. Applicable to low clearance, stacked printed circuit board and solid state power designs, the Low-Boy will allow closer board stack spacing at lower power levels (down to 200mA at 10 volts). Semi-toroidal construction reduces radiated magnetic fields and results in balanced windings. Non-concentric winding provides isolation by design, eliminating the need for an electrostatic shield. Allow 3/4" card spacing for 2 and 3, VA units; 1" for 4, 5, and 6VA; 1¼" for 12VA units. Dual Primaries — 115/230V, 50/60 Hz. Allows standard hi Pot — 2000 volts. Precision spaced p.c. terminals.

U.L. Recognized Unit (File Card E-68100)

Style K

Stancor's TTPC series transformers are designed to meet the high performance requirements of today's phone interconnect and instrumentation applications. Stancor has the broadest range of units for general use in impedance matching, circuit isolation, line balancing or bridging, and hybrid applications. TTPC transformers are ideal for use in voice and data interconnect networks such as modem terminal connection to telephone lines. Stancor's units will handle 1500 volts dielectric withstand and meet FCC Part 68 requirements. See below for the highest quality and broadest selection of styles.

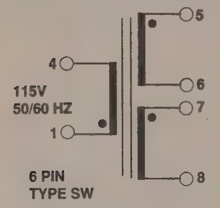
Side Winder

Side Winder applications include electronic game systems, computer peripherals, medical electronics, and switching power supplies. Split bobbin winding and low capacitive coupling design eliminates electrostatic shielding requirement and expense. High isolation, 2,500 V rms. Hi-Pot testing. PC pins, precision spaced, insert directly into PC boards. Class B insulation, 130° C.



Size	Dimensions — Inches								Wt. Lbs.
	VA	H	W	L	ML	A	B	C

POWERSTAT® Variable Transformers with patented POWERKOTE® Coils provide a simple rugged method of controlling electrical voltage current and power. They take in utility line voltage and provide continuously adjustable output voltage. Most frame sizes are available with a boost option to allow operation up to 17% above input nominal. Open construction models have letter U suffix in the style number and have the shaft extending from the end of the assembly for panel mounting. All plug-in models have input cord-plug sets, output receptacles, switches and fuses and are connected for clockwise knob rotation. Other models, including motorized are also available. Call Allied for details. **Attributes:** Prefix — L = Enclosed, 3PN = 3-wire cord receptacle; Suffix — U = Open construction, T = Terminal enclosure, D = Open delta.

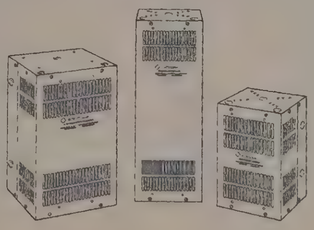
NEMA Enclosures

— NEW —



PBA Enclosures are specifically designed to house open construction (suffix U) POWERSTAT Variable Transformers. They are NEMA Type 1 as defined in NEMA Standard ICS 1-110. Constructed of heavy gauge metal, they are supplied completely assembled. Enclosures for multiple ganged units also available.

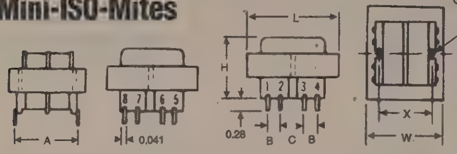
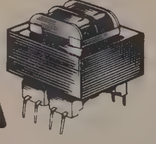
Mini-ISO-Mites





The Mini-ISO-Mites are low voltage, plug-in, power transformers. 8-pin dual 115/230 V primaries and secondaries are wound non-concentrically meaning, side by side. This construction results in smaller units and eliminates the need for costly electro-static shielding. Highly isolated units with 2500 HIPOT standard and are built to MIL-T-27 specifications.

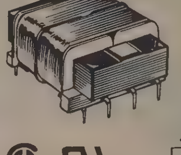
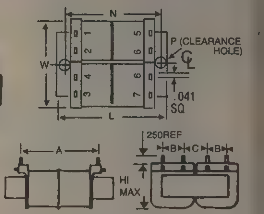
Flat Compact Series

Use where space is critical. For single or dual output DC supplies and isolated control circuits and reference supplies. Incorporates non-concentric windings which means the secondary is located next to the primary instead of being wound directly over it. Hum-bucking (semitoroidal) construction diminishes radiated magnetic field and balanced windings.





Primary 115/230 V, 50/60 Hz

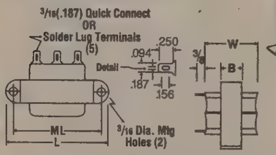
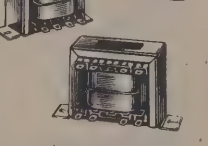
Condensed for Power Series





The CFP Series include a grain oriented core for high saturation density, lower core loss, and less steel and copper use; split bobbin for non-concentric winding (lower capacitance, high isolation, better insulation) no cross-overs of primary and secondary leads; bobbin wound for reduced size.

Primary 115/230 V, 50/60 Hz (All Sizes Available with Single 115 V Primary)

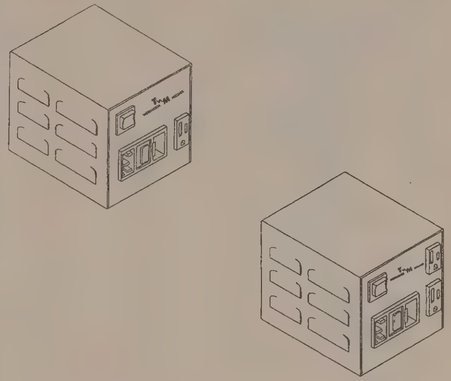
Foreign Power Supplies and Power Cords



- Four Convenient Power Sizes
- IEC Input Port For Foreign Cords
- Operates On 50 Hz and 60 Hz Input With Safety*
- Isolated Output Receptacle
- Convenient On-Off Switch
- Circuit Breaker
- Voltage Selector
- Power For Photographic/TV Crews Abroad
- Power For International Trade Shows
- Conversion for U.S. Appliances in Foreign Use

*Note: Unit does not change frequency. Use only for equipment that can be operated on 50 Hz only, 60 Hz only or 50/60 Hz.

Universal Voltage Converters — Converts 100/120/220/240 V to isolated 120 V with optional foreign power IEC input cords to suit your use location.

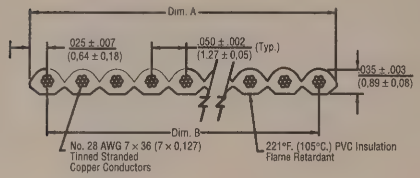
Scotchflex Flat Cable

Flat Cable



Easily zippable gray flat cable is on .050" (1.27 mm) spacing with #1 conductor colored red, 28 AWG, 7/36" stranded tinned copper wire; flame retardant PVC insulator. **Voltage Rating:** 300 V. **Insulation Material:** .1 × 10¹⁰ ohms (3 m). **Nominal Thickness:** .035".

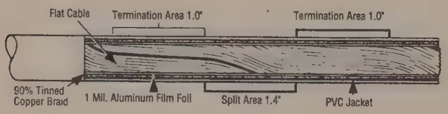
Round, Jacketed, Flat Cable with Shield



The inner 3365 Series gray flat cable has repeating areas of split and unsplit lengths to accommodate discrete or flat cable terminations. The flat cable is folded, wrapped with an aluminum/polyester film foil and then enclosed in a round, tinned copper braid for complete EMI/ESD protection. The outer jacket is flexible PVC. Combines the flexibility of round cable with the labor/cost efficiency of flat cable.

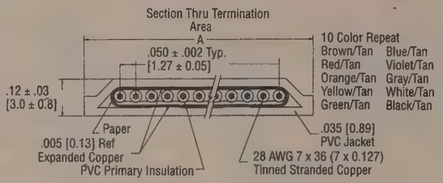
.050" Shielded/Jacketed Flat Cable



Meets external wiring requirements of National Electrical Code, Article 725 (CL2). CSA Certified AWM for external wiring. Flat jacket and expanded copper mesh shield provides durability, superior EMI and ESD protection. Provides better signal integrity and grounding than aluminum/mylar shielded cables. Jacket imprinted for flat section identification. **Jacket Material:** Polyvinyl chloride (PVC). **Color:** Black. **Primary Material:** PVC. **Conductors:** 28 AWG 7 × 36 (7 × 0.127) tinned stranded copper. **Shielding:** Expanded copper.

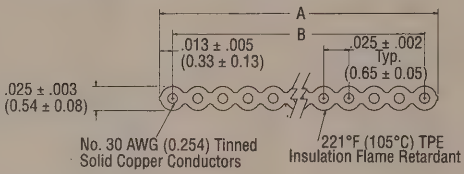
.025" Round Conductor Flat Cable



Close spacing permits higher signal density. TPE insulation provides excellent transmission properties at low cost. 30 AWG conductors on .025 inch spacing allows for mass termination. **Insulation Material:** Thermoplastic Elastomer (TPE). **Color:** Gray. **Marking:** Blue edge. **Conductors:** 30 AWG (0.254) tinned solid copper.

FP-301 Multi-Purpose Flexible Polyolefin Heat Shrink Tubing

FP-301 offers an excellent balance of physical, electrical and chemical properties for protecting a wide variety of electronic, electrical, and mechanical applications, such as cable splices, wire marking, harness covering, strain relief, and component packaging. Meets UL/CSA requirements for flame retardance (except Clear), 2:1 shrink ratio, rated for –55°C to +135°C (+275°F) and 600 V continuous operation. Meets MIL-I-23053/5 Class 1 or 2 requirements. **Minimum Shrink Temperature:** 121°C. **Colors Available:** 1-Black, 4-Clear (available in all put-ups), 2-Red, 3-White, 5-Yellow, 6-Blue, 7-Green (available in selected sizes of 4-foot lengths and in color assortments). Insert the color number where N appears in the stock number. UL E39100, CSA LR38227.

MW Adhesive Lined, 2.5:1, Semi-Rigid Polyolefin Heat Shrink Tubing

MW encapsulates and seals in one step in the same way as EPS-200. Semi-rigid outer wall gives superior abrasion and cut-through resistance. 2.5:1 shrink ratio, –55°C to +100°C continuous operating temperature, meets MIL-I-23053/6 Class 1. Black only.

EPS-200 Adhesive Lined, 2:1, Flexible Polyolefin Heat Shrink Tubing

EPS-200 features one step environmental protection of electronic, electrical, automotive and marine wiring. As the flame retardant, flexible polyolefin outer wall shrinks to a skin-tight fit, the hot melt adhesive is pushed into voids and crevices. Upon cooling the adhesive solidifies and bonds to form a permanent moisture proof barrier. 2:1 shrink ratio, jacket meets UL 224 all tubing flame test, –55°C to +100°C continuous operating temperature, meets MIL-I-23053/6 Class 2. Black only.

EPS-300 Adhesive Lined, 3:1, Flexible Polyolefin Heat Shrink Tubing

The meltable inner wall of EPS-300 forms a moisture proof barrier in one step in the same way as EPS-200, making it the product of choice for outdoor, automotive, or marine applications. The 3:1 shrink ratio helps to seal uneven surfaces such as connectors and components. Jacket meets UL 224 all tubing flame test, –55°C to +110°C continuous operating temperature, meets MIL-I-23053/6 Class 3. Black only.

EPS-400 Adhesive Lined, 4:1, Semi-Rigid Polyolefin Heat Shrink Tubing

EPS-400 provides one step environmental protection in the same way as EPS-200, but a thicker meltable makes it ideal for sealing multiple wire bundles. The 4:1 shrink ratio helps seal uneven surfaces such as in-line components. A heavy outer wall provides tough mechanical protection. –55°C to +110°C continuous operating temperature. Black only.

VFP-876 Very Flexible Low Shrink Temperature Polyolefin Heat Shrink Tubing

VFP-876 offers the same physical, electrical, and chemical properties as FP-301 with two additional features: 100°C shrink temperature (versus 121°C) to minimize damage on temperature sensitive components, and extra flexibility for insulating flexible wire bundles. Meets MIL-R-46846 Type V. Black only. UL E39100, CSA LR38227.

SR-350 Semi-Rigid Polyolefin Heat Shrink Tubing

SR-350 offers superior cut through and abrasion resistance as well as excellent physical, electrical, and chemical properties. Used for strain relief and insulating mechanically weak or susceptible points such as solder joints, wire splices and terminations. Printed easily, 2:1 shrink ratio, UL recognized for flame retardance and 600V, –55°C to +135°C continuous operating temperature, meets MIL-I-23053/6. Black only. UL E39100.

Kynar* Modified Polyvinylidene Fluoride (PVDF) Heat Shrink Tubing

Kynar is an excellent insulation for extremes in temperature or environment. Kynar is flame retardant and is rated for continuous operation from –55°C to +175°C. PVDF fluoropolymer makes it resistant to corrosive chemicals, solvents and oils, as well as mechanically tough for cut-through and abrasion resistance. Rigidity and transparency make it a good choice for strain relief and identification. 2:1 shrink ratio, UL recognized for VW-1, meets MIL-I-23053/8. Clear only. UL E39100.

*Kynar — Pennwalt Chemical.

NST Modified Polychloroprene (Neoprene*) Flexible Heat Shrink Tubing

NST is particularly useful for fabrication and repair of flexible rubber harnesses, wire bundles, and for hydraulic couplings. Its superior cut-through and abrasion resistance allow use in heavy duty applications such as drop lines, drag lines, and industrial equipment cable. Excellent oil resistance make it ideal for automotive, aircraft, and construction equipments. Maintains its flexibility and resistance to vibration at temperatures down to –70°C and up to +121°C. 2:1 shrink ratio, meets MIL-I-23053/1 Class 1 and 2, and MIL-R-46846 Type I Class 1. Black only.

*Neoprene — E.I. Du Pont.

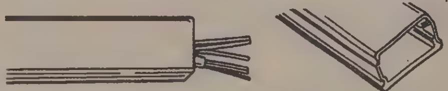
Communications Wire and Cable Duct



This duct has an easily installed one-piece design with a unique top-opening hinge that can be opened and closed thousands of times with no stress cracking or discoloration. The modern symmetrical design means fewer components and hides the self-locking latch. Constructed of 94V-0 UL Listed material, with strong foam-backed acrylic adhesive. 3M wiring duct is available in three sizes and has numerous accessories. White and grey are also available from 3M.

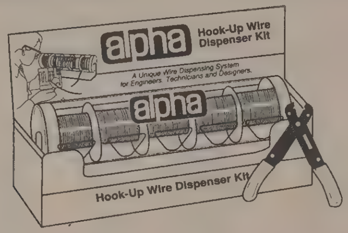
Hook-Up Wire Dispenser Kits



alpha
Hook-Up Wire Dispenser Kit
A Unique Wire Dispensing System for Engineers, Technicians and Designers.
alpha
Hook-Up Wire Dispenser Kit

- ► Convenient, Wire Dispensing System
- ► Five Assorted Hook Up Wire Colors
- ► Includes Cut and Strip Tool

Each kit contains five spools of hook-up wire in a unique, rack mounted, transparent dispensing tube. The tube and rack system can be mounted on a bench or wall or used as a tote for portability. Uses standard Alpha hook-up wire spools when refills are required. Includes a cut and strip tool. Available in military or UL/CSA applications. Come with a 100' colors white, black, red, green and blue 22 AWG.

Kynar® Insulation for Wire Wrap UL 1422, UL 1423

Solid silver-plated, oxygen-free high conductivity (OFHC) copper conductor, extruded kynar (polyvinylidene fluoride) insulation. Extremely tough, high cut-through resistance. Self-extinguishing, will not support combustion. Excellent ultra-violet and weathering resistance. Temperature rating through 125°C continuous (U.L. rated at 105°C). **Nominal Wall Thickness:** .005". **Colors Available:** 1 — White, 2 — Black, 3 — Red, 6 — Blue. ®Trademark of Pennwalt.

Round-to-Flat Cable 0.050" Centers — UL 2651/20381

Description
- ► Mass Terminated Round Cable
- ► Flat Cable on 0.50" Centers
- ► Supershield™ Aluminum/Polyester Tape Plus 90% Tinned Copper Braid

Application
- ► Specially Designed for Routing in Cramped Spaces Where the Mess Termination Capabilities of Flat Cable Is Required and the Flexibility of Round Cable Is Needed

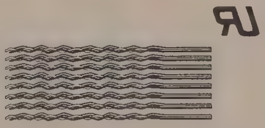
Color-Coded Twist-To-Flat Cable 0.050" Centers — UL 20184



Description
- ► 28 AWG 7/36 Stranded Tinned Copper Conductors, PVC Insulation
- ► 10 Standard Color Repeat With Tan as the Common Color in Each Pair
- ► Overall Cable Thickness .037" Males With all 0.50" IDCs
- ► High Stability .007" Laminated Film is Needed to Increase Dimensional Stability
- ► Twisted Length 18", Flat Length 2"
- ► UL Recognized. Style 20184 (Internal Use Only)

Application
- ► Ideal for Situations Where Reduced Crosstalk is Necessary Such as High Speed Data Transmission in Computers, Cash Registers, and Communications Equipment

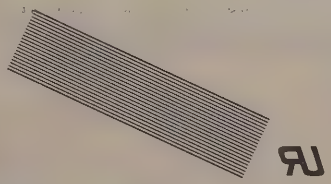
Flat Cable — 100' Coils Gray Flat Cable 0.025" Centers — UL 2678



Description
- ► 30 AWG, Solid Copper Conductors on 0.025" Centers
- ► Gray PVC Insulation With Red Strips on Leading Edge
- ► UL Recognized Style 2678
- ► Resists Acids, Alkalis, Oil, Moisture, Solvents, Ozone and Fungus
- ► Passes UL VW-1 Flame Test

Application
- ► Easy Termination to 0.025" IDC Connectors
- ► Low Cost Alternative to Fluorocarbon Transmission Cables
- ► For New Generation of Surface Mounted Connectors With Reduced Contact Spacing

Commercial Grade Thin-Net Coaxial Cable 10 MBPS

Alpha offers economical commercial grade LAN cable alternatives. These cables are designed around the IEEE specifications, but utilize cellular (foam) dielectric to reduce size and material while still offering equivalent electrical and environmental performance. Because a cellular dielectric is used, the diameter must be reduced to achieve the same electrical performance. This has an added benefit of reducing the cost of materials. However, it does not strictly meet the diameter (4.9 mm ±0.3 mm diameter for PVC or 4.7 mm ±0.3 mm for fluoropolymer jacket) required by the IEEE 802.3, 10Base2 specification. Therefore, we call it commercial grade.

PVC Plenum Rated Multi Conductor Foil Shielded NEC Article 725

PVC Plenum rated cables provide an economic alternative as compared to Fluoropolymer based products. The flexible construction allows for ease of installation and meets UL Type CL2P and CSA FT6 requirements. Bare copper with PVC Plenum insulation and jacket.

Microphone Cables

Shielded Microphone Cable

60°C PE/PVC. **Type 1703.** Stranded tinned copper conductor. White polyethylene insulation. Braided tinned copper shield. Gray-polyvinylchloride jacket. **Suggested Working Voltage:** 3500 V. Type 1703 is for high impedance microphones. **Type 1710.** Stranded tinned copper conductor. Color-coded polyethylene insulation; Conductor 1 — White; Conductor 2 — Black. Cabled with fillers. Wrap over conductors. Braided tinned copper shield. Black polyvinylchloride jacket. **Suggested Working Voltage:** 1000 V. Type 1710 is for low impedance applications.

Choose Xtra•Guard 1 For
- Unsurpassed Flame and Moisture Resistance
- Fast, Easy Stripping of Insulation and Jacket
- UL Recognized and UL Listed
- Flexible Cable Routing Requirements

Xtra•Guard 1 Use Examples
- EIA RS 232C Interface
- High Technology Applications in Controlled Environments
- Point-Of-Sale Equipment
- Computer Peripherals
- Industrial Process Controls

Conductor: Stranded tin coated copper. **Conductor Styles:** 24 and 22 AWG — UL 1061, CSA AWM SR-PVC; 20, 18 and 16 AWG — UL 1007, CSA AWM PVC. **Insulation:** Color coded, 80°C premium polyvinylchloride. **Shield:** Aluminum/polyester (25% overlap, typical), foil facing in plus stranded, tinned copper drain wire equal in size to insulated conductors of cable. Nylon rip cord for ease of jacket stripping. **Cable Styles:** UL type CM, AWM 2464, CSA PCC FT4. **Operating Temperature Range:** –20°C to +80°C AWM (75°C — CM). **Jacket:** Premium polyvinylchloride in gray or black; stocked in gray. **Cable Style:** UL 2464.

Multiconductor, Multipair SUPRASHIELD™

Choose Xtra•Guard 1 For
- Unsurpassed Flame and Moisture Resistance
- Fast, Easy Stripping of Insulation and Jacket
- UL Recognized and UL Listed
- Flexible Cable Routing Requirements

Xtra•Guard 1 Applications
- EIA RS 232C Interface (24 AWG, 22 AWG)
- High Technology Applications in Controlled Environments
- Point-Of-Sale Equipment
- Computer Peripherals
- Industrial Process Controls

Conductor: Stranded tin coated copper. **Insulation:** Color coded, 80°C premium polyvinylchloride 24 and 22 AWG — UL Style 1061, CSA AWM SR-PVC; 20, 18 and 16 AWG — UL Style 1007, CSA AWM PVC. **SupraShield™:** Aluminum/polyester/aluminum foil with drain wire plus overall braid of tinned copper. **Jacket:** Premium polyvinylchloride. **Cable Styles:** UL Type CM, AWM 2464, CSA PCC FT4. **Operating Temperature Range:** –20°C to +80°C — AWM (+75°C — CM). **Specifications:** CM rated. **Jacket Colors:** Gray or black; stocked in gray. **Cable Style:** UL 2464.

Instrumentation Cable

- ► UL Listed Under Standard 13
- ► Complies With NEC Article 725 — Type PLTC, NEC300 and NEC340
- ► ULVW-1 — 300 Volt Rated Cables Pass UL Vertical Flame Test
- ► CSA Certified — 300 Volt
- ► IEEE383 — Both 300 Volt PLTC and 600 Volt Tray Cables Pass the 70,000 BTU — Vertical Tray Flame Test

American manufacturers are automating to meet world-wide competition. However, the vital functions of measurement and control of manufacturing and process operations is dependent on the electronic circuitry and instrumentation cable used in these control networks. Alpha's instrumentation cable provides you with minimal interference and maximum durability in full compliance with all industry standards.

105°C 300V PVC

- ► Stranded Bare Copper Conductors
- ► Extruded PVC Insulation
- ► Paired Construction Color-Coded — One Black, One White; Triple Constructions Color-Coded Black, White and Red
- ► All Pairs and Triples Twisted To Minimize Magnetic Noise
- ► White Conductor (Multi-Pairs and Multi-Triples) Printed with a Pair or Triple Number at 1" (25.4 mm) Intervals for Easy Identification
- ► When Shielded, Aluminum Polyester Shield Tape and Tinned Copper Drain Wire Provided for Maximum Electrostatic Noise and Cross Talk Rejection
- ► Nylon Rip Cord Under Jacket to Simplify Stripping
- ► Extruded Black PVC Jacket Meets 70,000 BTU Flame Test
- ► Temperature Range: –20°C to +105°C (UL) Static Conditions
- ► Voltage Rating: 300 Volts (UL)
- ► An Economical, General Purpose, Flame Retardant Construction with Excellent Chemical and Abrasion Resistance
- ► UL Listed Under Standard 13
- ► Complies With NEC Article 725, Type PLTC
- ► Available in Long Continuous Lengths

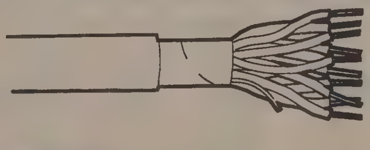
90°C 600V PVC/Nylon



- ► Standard Bare Copper Conductors
- ► Extruded PVC Insulation with Nylon
- ► Paired Constructions Color-Coded — One Black, One White; Triple Constructions Color-Coded Black, White and Red
- ► All Pairs and Triples Twisted To Minimize Magnetic Noise
- ► Each Conductor (Multi-pairs and Multi-triples) Printed with a Pair or Triple Number At 1" (25.4 mm) Intervals for Easy Identification; Numbers Are Printed Alternately and Inverted
- ► Nylon Jacketing of Each Conductor Provides Increased Dielectric Strength
- ► When Shielded, Aluminum Polyester Shield Tape and Tinned Copper Drain Wire Provided For Maximum Electrostatic Noise and Cross Talk Rejection
- ► Nylon Rip Cord Under Jacket to Simplify Stripping
- ► Extruded Black PVC Jacket Exceeds Test Criteria Established By Underwriters Laboratories Tray Fire Test, Based On IEEE Standard 383, 70,000 BTU Flame Test
- ► Temperature Range: –20°C to +90°C (UL +90°C) — Static Conditions
- ► Voltage Rating: 600 Volts (UL)
- ► PVC/Nylon Construction Results in a 600 Volt Small Diameter Cable that Saves Space
- ► Nylon Permits a Slipping Action Between Conductors that Relieves Stresses Developed When Cable Is Flexed
- ► Listed as Tray Cable Under UL Standard 1277 and NEC Article 340 (Article 725 Class 1)
- ► Available In Long Continuous Lengths
- ► Commonly Utilized For In-Plant Process Control

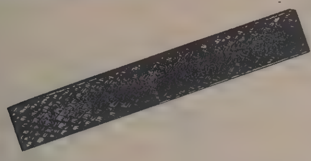
Braid Bus Bar, Test Lead Wire and Lacing Cord

Tinned Copper Flat Braid



- ► Flexible Ground Strips
- ► Connect Moving Parts
- ► Retrofit Applications
- ► Bonding Straps

Woven tinned copper braid rolled to specific width. Meets requirements of Fed. Spec. QQ-W-343E Type S and ASTM-B-33. *Values shown are for bare cable in free air at 30°C and intended as a reference guide only. Actual values will depend on permissible temp. rise, permissible voltage drop and other conditions of service.

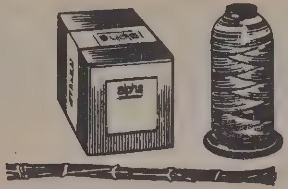
Twisted Lacing Cord and Flat Braid Lacing Tape



Nylon and Dacron Flat Braided Lacing Tape. All types are nylon. All types are designation MIL-T-43435 with variations for type, size, and finish. LC-132 has a finish of synthetic rubber-like resin with non-mercuric fungicidal properties. Melting point is above 190°F. Softens at 140°F but doesn't flow. LC-134 and LC-136 have a finish of micro-Crystalline wax with a melting point above 130°F, compounded with a fungicide containing neither copper nor mercury. Soft, pliable and easy to tie. Also meets MIL-T-713 Type P, Class 2. LC-140 has a finish of a special continuous coating of fungistatic synthetic rubber. Knots tied with this finish will not slip. Extremely pliable and soft. LC-143 has a thermoplastic synthetic resin with a melting point above 350°F for use where a "wax free" type is specified. Dry, non-flaking finish. Available in white and black — insert 1 (white) or 2 (black) where X appears in Stock Number.

Copper Shielding Tape

- ► UL Standard 510
- ► MIL-Standard 202C
- ► ASTM-D-1000
- ► UL Recognized
- ► Highly Conductive Pressure Sensitive Adhesive
- ► Oxidation Resistant Conductive Particles in Adhesive Produce Very Low Resistance Through Tape

Provides a low impedance connection between metal connector backshell and the braided cable shield in molded cables. An effective EMI/RFI shielded cable assembly can be achieved without soldering the tape to the braid or backshell (a tin-plated backshell is recommended). Provides electrical contact to surfaces that cannot be soldered such as conductive plastic. EMI/RMF shielding of cables by wrapping the tape around the cable. (Recommend 40-50% overlap). Provides electrical continuity in seams of EMI/RFI shielded rooms. Draining of static charges. Bus bar application. **Specifications. Tensile Strength:** 21 lbs./in. **Adhesion:** 40 oz./in. **Thickness:** .003 in. **Flammability:** Flame retardant per UL Standard 510. **Electrical Resistance Through Tape:** .003 ohms/in.^{2} **Shielding Effectiveness:** 50 dB.

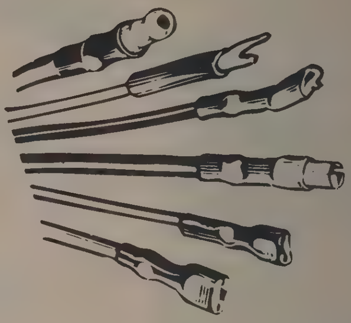
FIT® 221 — Irradiated Polyolefin

► **UL Standard 224, CSA Standard 198 MIL-I-23053/5B, AMS 3636 (Colors), AMS 3637 (Clear)**

FIT-221 is the most widely used general purpose heat-shrinkable tubing. It is flexible, flame-retardant, self-extinguishing and fungus-resistant. The tubing shrinks a minimum of 50% of supplied diameter at 121°C longitudinal shrinkage, ±5% (UL224). **Operating Temperature:** –55°C to +135°C. **Tensile Strength:** 1800 psi nominal. **Colors Available:** 1-Black, 2-Red, 3-White, 4-Clear**; 5-Yellow; 6-Green; and 7-Blue. Insert the color number where N appears in the stock number.
**No UL recognition, CSA Certification on clear.



Now Stocked in 50' and 100' Lengths!

50'-100' FIT 221 Spools
FIT 221 is now available in 50' or 100' spools where noted. These shorter length spools are perfect for on-site installation needs. The spool is easily stored on any rack. Preprinted instructions are located right on the spool. The spool is packaged in a clear bag. Available in black and clear.

FIT® 221V — Highly Flame Retardant Polyolefin

- ► **UL Recognized and CSA Certified**
- ► **Flame Retardant: Passes UL VW-1 Flame Test**
- ► **UL Standard 224, CSA Standard 198**

A radiation cross-linked polyolefin heat-shrinkable tubing designed for a wide range of applications requiring a highly flame retardant material. **Typical Applications:** for use where UL recognition with VW-1 is needed; harness bundling; electrical insulation; cable jacketing; lightweight harmless jackets; terminal insulation; wire strain relief; general purpose component packaging. **Specifications. Color:** Black. **Operating Temperature:** –40°C to +125°C. **Shrinkage Ratio:** 2:1 at 121°C. **Tensile Strength:** 1800 psi, nom. **Longitudinal Shrinkage:** ±3%. **Dielectric Strength:** 500 V/mil. **Volume Resistivity:** 1014 ohm/cm.

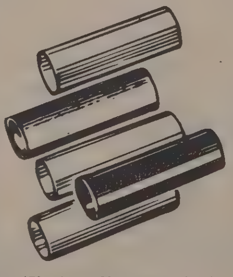
FIT® 300 — Surface Irradiated Polyolefin

- ► **MIL-I-23053/4B, Class 1 AMS-3634**
- ► **UL Standard 224**
- ► **UL Recognized (Black Only)**



When heated, the outer jacket shrinks and the inner wall melts and flows. The result is semi-rigid tubing with an inner wall that seals and provides tough mechanical protection. The tubing shrinks to 15% to 40% of the supplied diameter depending on the size at 135°C. Longitudinal shrinkage is 10% nominal. Non-flame retardant. Does not support fungus growth. **Operating Temperature:** –55°C to +110°C. **Tensile Strength:** 2500 psi nominal. All sizes available in black, but only one additional color is available for each size (see right). For 6" lengths, insert '5' where N appears in the stock number. For 4' lengths, insert '7' where N appears in the stock number.

FIT® 105 — Flexible Irradiated Polyvinylchloride

► **UL Recognized/CSA Certified, MIL-I-23053/2C***

FIT 105 is an economical alternative to crosslinked polyolefin tubing in some circumstances. FIT 105 features high mechanical strength and excellent flexibility. It will not cold flow or melt and will not split — even over sharp edges. It is flame-retardant, self extinguishing, and does not support fungus growth (MIL-I-7444). The tubing shrinks to 50% of supplied diameter at 175°C, longitudinal shrinkage 10% nominal. **Operating Temperature:** –35°C to +105°C. Tensile strength 2600 psi nominal. Stocked in black.

*MIL-I-23053/2C is inactive for new design and is no longer used by the Department of Defense except for replacement purposes.

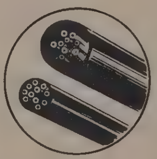
FIT® FLEX



FIT® FLEX provides strain relief, terminal insulation, cable jacketing and wire harnessing protection in applications where flexibility and durability are mandatory. Most flexible heat shrink tubing product in the industry. Passes the UL VW-1 flame test. **Operating Temperature:** –75°C to +200°C (UL). **Shrink Ratio:** approximately 1.7:1 at 125°C. Non-corrosive. **Water Absorption:** 0.4%. 1 year shelf life. Stocked in gray.

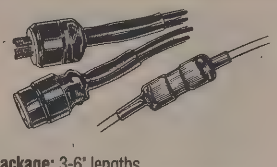
FIT® 621 High Shrink Ratio Tubing



► **Shrinks to 1/6 Original Size**

Adhesive-lined, polyolefin shrink tubing that shrinks up to 1/6 of the supplied diameter at 120°C. Superior moisture protection. Excellent for field repair of indoor-outdoor cables rated to 1000V. Suitable for direct burial. Conforms to odd shapes and sizes. **Operating Temperature:** –40°C to +125°C. **Color:** Black. **Package:** 3-6" lengths.

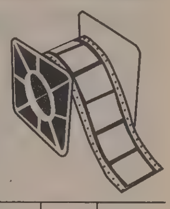
Heat Shrinkable Identification System
FIT®-PRINT



Polyolefin tubing with a shrink ratio of 3:1 at 125°C. Smear-resistant, permanent identification. The sleeves feed directly into standard typewriters or dot matrix printers. For best results use a ribbon with a high carbon content and for write-on convenience a standard ball point pen may also be used. Flame retardant. 250 markers per spool.

FIT® 321...High Shrink Ratio (3:1) Polyolefin

- ► **6" Lengths**
- ► **3:1 Shrink Ratio**
- ► **Flame Retarded Outer Wall**
- ► **Water Resistant (0.5% Maximum Absorption)**

When heated, inner wall melts and fills all crevices and interstices of the covered object while outer wall shrinks. Upon cooling, the entire mass becomes a tough molding that provides excellent environmental protection. **Specifications. Operating Temperature:** –55°C to +110°C. **Shrink Ratio:** 3:1 at 125°C. **Tensile Strength:** 2500 psi, nominal. **Ultimate Elongation:** 400% nominal. **Longitudinal Shrinkage:** 15%, nominal. MIL-I-23053C/4B Class 3.

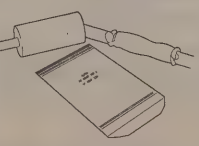
FIT® WRAP



Alpha's innovative FIT® WRAP sleeves redefine the FIT® shrinkable tubing concept! FIT® WRAP permanently repairs damaged or split cables without cutting or disconnecting them from equipment. A fast and easy solution that eliminates costly downtime! Meets MIL-I-23053/15A flammability requirements. Resists de-icing and hydraulic fluid, JP-4, diesel and lubricating oils and 5% NaCl. Non-corrosive, outer wall self-extinguishing. **Operating Temperature:** –55°C to +110°C. **Shrinkage Ratio:** 3:1 at +121°C, depending on size. **Physical Properties. Tensile Strength:** 1200 psi. **Ultimate Elongation:** 200%. **Specific Gravity:** 1.4. **Low Temperature Flexibility:** no cracking after four hours exposure at –55°C.

FIT® 350 Irradiated Kynar*

► **UL Subject 224 CSA Standard 198 MIL-I-23053/8B AMS 3632**

FIT-350 is transparent, thin-wall, high temperature, flame-retardant tubing which is excellent for installations requiring high resistance to abrasion and cut-through. Allows easy inspection of covered components. The tubing shrinks to 50% of supplied diameter at 175°C, longitudinal shrinkage 5% nominal. Semi-rigid, chemical resistant and self-extinguishing. Does not support fungus growth. **Operating Temperature:** –55°C to +175°C. **Tensile Strength:** 8000 psi, nominal. 4' lengths are available by special order.

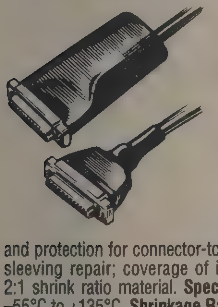
FIT® 421...High Shrink Ratio (4:1) Polyolefin



Stands up to your toughest tests. FIT 421 is a tough, irradiated polyolefin with a 4:1 shrinkage ratio that solves the problem of covering and protecting the connections between cables and bulky connectors. **Applications:** Insulation and protection for connector-to-cable terminations; harmless jacket sleeving repair; coverage of irregular shapes not possible with 2:1 shrink ratio material. **Specifications. Operating Temperature:** –55°C to +135°C. **Shrinkage Ratio:** 4:1 at 121°C. **Tensile Strength:** 1800 psi. **Longitudinal Shrinkage:** 50% maximum. MIL-I-23053/5B Class 1 overexpanded. AMS 3636D. Non-corrosive; self-extinguishing. **Color:** Black.

Alpha BNC Connectors

Alpha BNC connectors provide highly reliable, quick connect/disconnect coaxial connections. A quick coupling device for plug and jack connectors is accomplished by rotation of a cam operating device designed to bring the two halves together. Alpha's hex terminations insure high conductivity, low resistance and high pullout values.

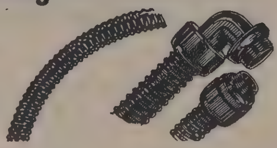
Flexible, Non-Metallic Electrical Tubing



- ► Available In Small 25' Coils
- ► UL Recognized. CSA Certified (Except For 1/4" Size)
- ► Fusion Of PVC Construction To Rigid PVC Core Forms Integral Extra-Flexible Tubing
- ► Smooth Inside Facilitates Easy Wire Pulling and Installation
- ► Uses Nylon Straight or Right-Angle Alpha Connectors Fittings To Insure Liquid Tight Integrity
- ► UL Rated: 70°C; Color: Black

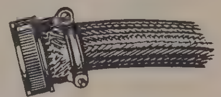
Expandable Braided Polyester Sleeving



Lightweight, expandable woven polyester sleeving. High flexibility; high resistance. Open weave for wide range of expansion of the sleeving diameter for easy installation and gripping action. An ideal protective sleeve for wire bundles, harnesses, wire and cable, pneumatic hoses, flat cable, hydraulic lines, and highly polished or threaded machine parts. **Specifications. Operating Temperature:** –70°C to +125°C (UL). Rot-Free, Fungus Proof Per MIL-STD-810B-Method 508. Not affected by most chemical environments and common solvents.

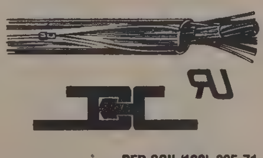
Zipper Tubing — ZIP-41 LOC-TRAC®



UL Standard 224, UL VW-1. Saves time and labor in making prototype cables. Adds extra jacketing protection to existing cable assemblies without need to disconnect or tape wrap. Ideal for cable repairs or modification — no need to disturb or disconnect existing connections. Zipper tubing is manufactured from the highest quality, high-temperature, stabilized PVC. **Temperature Range:** –36°C to 105°C. **Wall Thickness:** .020".

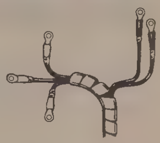
Spiral Wrap Tubing



Wire harnessing, cabling and bundling work is simplified with the use of Alpha's SW series spiral wrap tubing. SW tubing clings tightly to the wire and cable being bundled, yet is flexible and simple to apply. All types maintain flexibility, even when bent around sharp edges or subjected to repeated handling. Breakouts or tapoff connections may be made through the openings of the wrap.

Clear (natural) polyethylene with an operating temperature of –20°C to +80°C.

TFT Teflon Tubing ASTM D 3295

Exceptional toughness and flexibility throughout its temperature range. Superior dielectrical strength at high frequencies. Excellent heat and chemical resistance. Self-extinguishing, non-corrosive, does not support fungus growth. **Operating Temperature:** –65°C to +260°C. Natural color.

PVC-105 All Purpose Tubing

- ► **U.L. Recognized, CSA Certified ASTM D-876, D-922, MIL-I-1631D Passes UL VW-1 Flame Test**

Superior thermal, mechanical and electrical properties with economical cost.
Compounded with highest quality, non-migratory resinous type plasticizers–stabilizers and modifiers added. Flexible, resistant to heat, oil, abrasion, fungus and chemical corrosion. **Operating Temperature:** –20°C to +105°C. Furnished in black and clear in 100' lengths. Other colors and lengths available by special order.

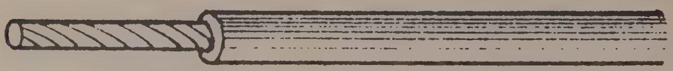
PVC Insulated Hook-up Wire



All hook-up wire has either tinned copper conductor insulated with extruded PVC or stranded silver-coated conductor insulated with extruded TFE Teflon®. PVC is flame and ozone resistant, as well as being inert to most chemicals, oils, and solvents. Teflon® is a fluorinated thermoplastic with outstanding thermal, physical, and electrical properties.

UL Style 1007 300V, 80°C Passes VW-1 Vertical Wire Flame Test

Rated 80°C, 300V. Rated 600V peak for electronic circuits, and internal wiring of electronic and electrical equipment.

High Temperature Teflon Insulated Hook-Up Wire

All hook-up wire has either tinned copper conductor insulated with extruded PVC or stranded silver-coated conductor insulated with extruded TFE Teflon®. PVC is flame and ozone resistant, as well as being inert to most chemicals, oils, and solvents. Teflon® is a fluorinated thermoplastic with outstanding thermal, physical, and electrical properties.

UL Style 1180 300V-200°C (Type EE) – MIL-W-16878E/5 Teflon — 1000V-200°C Passes VW-1 Vertical Wire Flame Test

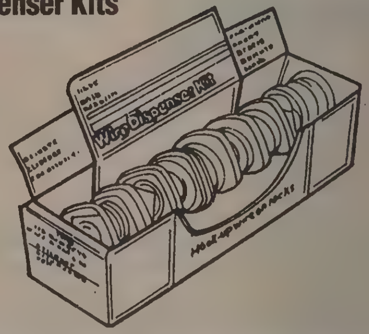
Hook-Up Wire Dispenser Kits



Ideal for R and D labs, engineers and technicians. Choose kits containing five 100' spools or eigh 25' spools of popular hook-up wire; each spool a different color. Spools come in portabl dispenser rack, convenient for field work, for work bench or wall mount use. Passes VW-1 Vertical Wire Flame Test.

Kits of Five 100-Foot Spools

Stock No.	Mfr.'s Type	Wire	Colors	EACH

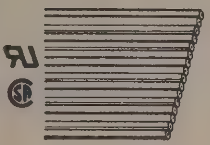
Standard Flat Cable

All flat cable types on this page are 28AWG (7 × 36) stranded and feature 0.050" conductor spacing. PVC insulated, except where noted, and rated 300 V, 105°C. **Voltage Rating:** 300 Vrms. **Dielectric Withstanding Voltage:** 2000 Vrms. All will terminate to any standard IDC flat cable connector. See Product Index for complete selection. Passes VW-1 vertical wire flame test. UL recognized.



9L280XX Series 0.050" Pitch Unshielded

Tinned copper conductors. Gray PVC insulation with red polarity stripe. CSA certified T1.

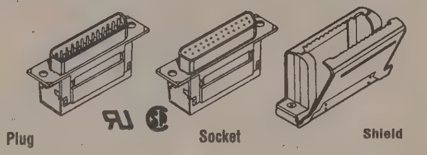
D-Subminiature Connectors with Metal Face and EMI/RFI Shield



Accepts standard 0.050" conductor center space flat cable without special cable preparation. No special alignment tools required. Accepts jacketed and shielded cable without need for a backshell. **Temperature Range:** -55° to +125°C. **Current Rating:** 1 A DC per contact. **UL Voltage Rating:** 125 VDC. Phosphor-bronze contacts with selective gold plating. UL recognized, CSA certified. Order type DSO0001 locator plate separately below.

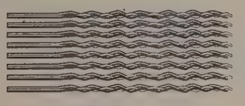
.050 Pitch PVC Vari-Twist® Flat Cable



UL 2693
105°C 300V VW-1
and/or
UL 2697
80°C 300V VW-1

Tinned copper (.050 conductor spacing in flat section). PVC preinsulated twisted pairs laminated to a Clear PVC substrate. Standard twist length is 18 inches followed by a 2-inch flat section. Each adjacent pair is twisted in an opposite direction. 28 Gage, Stranded 7 × 36. Passed VW-1 vertical wire flame test.

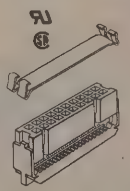
Standard-Profile Socket Connectors



MIL-C-83503 compatible. 0.100" (2.54mm) grid contact/terminal spacing. Insulated stainless steel strain relief strap. Gas-tight termination and daisy-chainable. Pre–assembled cover for easy termination. **Temperature Range:** -55° to +125°C. **Current Rating:** 1 A max. per contact. **UL Voltage Rating:** 125 VDC. Phosphor-bronze contacts with selective gold plating. UL recognized, CSA certified.

Belflex™ Premium PVC Jacket and Portable Cordage

A

B

C

D

- **Remains Flexible in Cold Temperatures**
- **Exceptional Oil Resistance**
- **Excellent Retractile Properties**
- **Superb Abrasion Resistance**
- **Distinctive Matte Black Appearance**

Belden® Belflex™ is a premium PVC jacket compound (Class 43) that is superior to standard PVC for flexibility and durability. Belflex cordage and cords offer a superior feel and appearance and are ideal for any number of applications where resiliency, ruggedness, and appearance are key considerations. It's a breakthrough jacketing compound that is an outstanding value. Twelve standard Belflex portable cordage products are now offered. Each features a matte black finish, as opposed to the normal glossy appearance of PVC, and is available in 250 ft. lengths. Custom power cords are also available using the new Belflex cordage. **Insulation Thickness:** .030" (.76 mm) except for 19502 and 19505 which are .045" (1.14 mm).

UL and CSA Approved For Outdoor Use. These Belflex jacketed cordage items have a US and CSA temperature rating of 105°C and are suitable for outside use. Belflex also passes the VW-1 Vertical Wire Flame Test. These constructions are approved as water and oil resistant.

Test Prod Wire

Stranded tinned-copper conductors, separator wrapping, red or black rubber insulated. Type 9899 is PVC insulated and UL recognized. Working voltages listed in table below are AC rms values and for intermittent-duty only. Type 8897 is manufactured per MIL-W-13169B specs; 8890 is miniature type wire.

Conformable® Coax Cable For Microwave and High Frequency Video Applications

- **Low VSWR Up To 20 GHz (50 Ohm Cables)**
- **Exceptional Phase Stability**
- **Patented Copper Foil Tape and Tin-Filled Composite Shield Provides Unmatched and Electrical Stability and Shielding Performance**
- **Longest Flex Life Of Any Hand-Formable Product On The Market**
- **Retention Of Shape After Bending, No Buckling When Reformed Or Flexed**
- **Reduced Equipment Spec Drawing Requirements and Shortened Design Time**
- **Reduced Labor, Purchasing, Manufacturing, and Packaging Expenses**

Microwave Applications

- **1671A — RG-405 Type 50 Ohm With .085" O.D.**
- **1673A — RG-402 Type 50 Ohm With .138" O.D.**

High Frequency Video Applications

- **1672 — 75 Ohm With .087" O.D. For High Frequency Video Applications**

50 Ohm Microwave Cables

Silver coated copper covered steel conductor, TFE Teflon insulation, and patented copper foil tape and tin-filled braid composite shield. –70° C to200° C. **Nominal Impedance:** 50 ohms. **Nominal Vel. of Prop.:** 69.5%. **Nominal Capacitance:** 29.5 pF/ft. (96.8 pF/m). Copper-tin composite shield. 100% shield coverage.

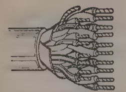
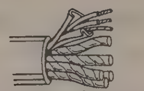
Paired Beldfoil® Shielded Tray Cable — UL Subject 13 and 444



Overall Shielded



Individually Shielded

Tinned copper stranded conductors, PVC insulated pairs, except **types 9328-9333, 9368, 9388-9391** which are twisted pairs. All with Beldfoil® shield and tinned copper drain wire. Chrome sun-resistant PVC jacket. Multi-pairs are numbered at one-inch intervals; conductor pairs are color-coded black and red. Meets UL Subject 13 (NEC Article 725 Type CL3) for use as tray cable; 300V, 105°C. Meets UL Subject 444 (NEC Article 800 Type CM) for use as communication cable. Meets CSA, PCC and FAS90.

Overall Shielded

Multi-Conductor Beldfoil® Shield Tray Cable — UL Subject 13 and 444

Two Cond.

Three Cond.

Tinned copper conductors cabled, PVC insulated. Beldfoil® tape shield with tinned copper drain wire. Sunlight-resistant PVC jacket. Tri-rated cable meets UL Subject 13, 300 V, 105°C; CSA PCC and/or FAS90. Also meets Article 725 of NEC, Class 2 and 3 requirements. **Types 9341** and **9342** feature same construction with PVC insulated nylon overcoat and are UL listed under Subject 1277 for use as Tray Cable in accordance with NEC Articles 318, 340 and 501, Class I 600 V, 90°C. Suitable for outdoor use and direct burial. All are NEC Type CM except **Types 9341, 9342**, which are NEC Type TC, and **Types 9364, 9366, 9367**, which are NEC **Type CL3**.

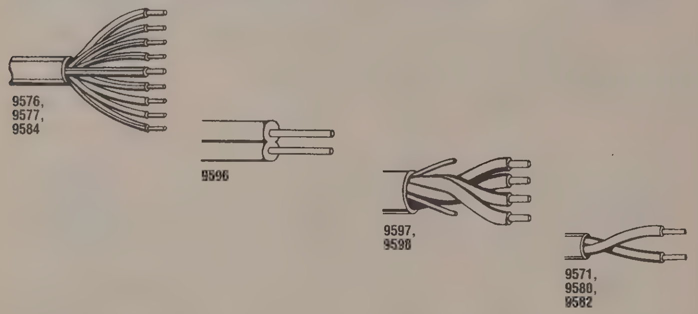
Multi-Conductor Unshielded Fire Alarm and Tray Cable



Types **9576, 9577** and **9584** have tinned copper solid conductors cabled, PVC insulated. Black PVC jacket. **Type 9596** has one solid conductor tinned copper; one conductor bare; parallel. Red PVC jacket. **Types 9597** and **9598** have bare copper solid conductors cabled, PVC insulated. Red PVC jacket. **Types 9571, 9580** and **9582** have solid bare copper conductors, PVC insulated. Red PVC jacket. All are NEC Type FPLR; power limited fire protective signaling circuit cable for use in accordance with NEC Article 760 power limited circuits. Suitable for use as a power limited circuit cable in accordance with NEC Article 725 Class 2 or 3 circuits, when marked as suitable for appropriate tray cable installations. 300 V, 105°C. Component Recognized UL 2464, 300 V, 80°C.

DataTray™ Cables for UL-1277 Tray Applications

Belden® DataTray™ cables provide excellent performance for a variety of data transmission applications in industrial environments where UL-1277 is desirable. This includes control systems such as PLCs and DCSs, as well as intercom systems, RS-232, RS-422 and RS-485 interfaces. The Belden® DataTray™ series of cables utilizes one pair of 18 AWG tinned copper conductors, with tight lay lengths to minimize 60 Hz interference. These cables feature low-attenuation FRPO insulation, and a 100% coverage tinned copper braid shield. The jacket is dark blue "sun resistant" PVC. DataTray™ cables are available in 78, 100 and 124 ohm impedance. **AWG Stranding:** 18 AWG (7 × 26) .046" tinned copper, 6.92 Ω/M' 22.7 Ω/km. **Nom. Vel. of Prop.:** 64.5%.

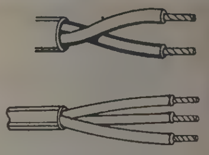
Multi-Conductor Unshielded Tray Cable — UL Subject 13 and 444



Tinned copper stranded conductors cabled, PVC insulated. Chrome sunlight resistant PVC jacket. Tri-rated cable meets UL Subject 13, 300 V, 105°C; Appliance Wiring Material style 2464, 300 V 80°C; CSA Appliance Wiring Material standards. Also meets Article 725 of NEC, Class 2 and 3 requirements. All are NEC Type CL3 except types 9491 and 9493 which are NEC Type CM.

Multi-Conductor Overall Foil/Braid Shielded Computer Cable — Datalene® Insulated

Low capacitance cables for EIA RS-232, EIA RS-423 and CAD/CAM applications. Tinned copper, Datalene® insulated, multi-conductor cable with overall Beldfoil® aluminum-polyester plus 65% tinned copper braid shield. 24 AWG stranded tinned copper drain wire. Chrome PVC jacket. Rated 30 V, 80°C. UL recognized. Datalene insulation features low dielectric constant and a dissipation factor for high-speed, low-distortion data handling. Physical properties include good crush resistance and light weight.

24 AWG Stranded Conductors (7 × 32) 2919, NEC Type CM

Multi-Conductor Shielded Cable

Multi-Conductor Shielded Broadcast, Audio and Instrumentation Cable

Tinned copper stranded conductors cabled. Polyethylene insulated except type 9770 which is polypropylene and has a paper wrap, and type 9418 which is S-R PVC insulated. All have Beldfoil® aluminum-polyester shield with stranded tinned copper drain wire except type 8729 which has 3 solid tinned copper-coated steel drain wires. All have PVC jackets. NEC type CM except type 8729, which is NEC type CL3. All UL recognized except type 9770.

Multi-Conductor Beldfoil® Shielded Fire Alarm and Tray Cable

9574
9575
9581

9579

9578

Solid bare copper conductors cabled with Beldfoil® aluminum-polyester shield. Stranded tinned copper drain wire. Red PVC jacket. NEC Type FPLR; power limited fire protective signaling circuit cable for use in accordance with NEC Article 760 power limited circuits. Suitable for use as a power limited circuit cable in accordance with NEC Article 725 Class 2 or 3 circuits, when marked as suitable for appropriate tray cable installations. 300V, 105°C. UL recognized 2464, 300V, 80°C.

Computer Cables

— NEW —

Datalene insulation features are low dielectric constant and a dissipation factor for high speed, low distortion data handling. Physical properties include good crush resistance and light weight. Tinned copper, twisted pairs, Duofoil aluminum-polyester shield, 22 AWG stranded tinned copper drain wire. Black PVC jacket. 22 AWG solid conductors. 100% shield coverage 30 V 60°C.

88240, 89259, 86262, 88241

89269

All are single solid conductor except Type 89259, which is single 7 × 30 stranded, Type 89907 (thinnet, 10 base 2), which is single 19 × 32 stranded and Type 89555 which is dual solid conductor. All are NEC type CL2P; Types 89108 and 89120 are also NEC type CATVP NEC article 725, class 2 circuits, UL listed. All are 200°C.

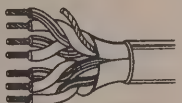
Paired Shielded Plenum Cable for Instrumentation, Computers and P.O.S.

88641, 88760, 88761

89182



89504

Tinned copper conductors, Teflon insulated and jacketed. Beldfoil® shield overall. 200°C, non-conduit. All are NEC Article 800, Type CMP and rated 300 Vrms except Type 89182, which is Duofoil® individually shielded computer, control, instrumentation cable for low capacitance applications — NEC Article 725 and 800, Type CL2P and rated 150 Vrms. All are UL listed and CSA PCC FT4/FT6 rated.

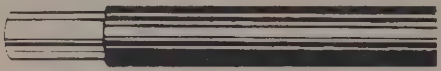
Magnet Wire



SP-Single Polyurethane Class A, Type T-1

Specification: MIL-W-583B. Readily solderable, adaptable to automatic soldering and winding operations. Round bar copper single conductor covered with Polyurethane film. Proved to have physical and electrical properties equal or superior to those of the oleoresinous and polyvinyl acetal films. 105°C. **Weight:** 1 lb. (gross).

Lacing Tapes and Twine

Designed to meet and exceed MIL-T-713, Type P and MIL-T-43435 Types I and II also AMS 3815, AMS 3816, AMS 3817.

Finishes and Coatings

W — Wax, MIL Spec "B". A microcrystalline fungicidal wax which exceeds military specifications, provides excellent knot retention and is suitable for either lacing or spot ties.

G — Synthetic Rubber, MIL Spec "C"
A special continuous coating of fungicidal synthetic elastomer (rubber) which exceeds MIL Spec requirements, ties easily and exhibits outstanding knot holding characteristics.

A — Synthetic Resin, MIL Spec "E"
A synthetic rubber-like resin formulated with fungicidal ingredients. Handling characteristics are excellent, knot retention is outstanding; meets or exceeds MIL Spec requirements.

Operational Temperature Ranges: –67°F to +250°F on all items.

Nylon Lacing Tape MIL-T-43435 Type-I

Flat braided high tenacity nylon yarn impregnated with microcrystalline fungicidal wax or impregnations to meet military specifications.

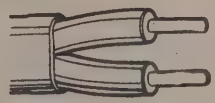
Power-Limited Circuit Cable

— NEW —



70,000 B.T.U.

OSHA

VW-1

NEC

Stranded tinned copper conductors. Insulation is color-coded polyvinylchloride. Jacket is chrome polyvinylchloride. **Temperature Range:** 105°C, 300 volts. UL Subject 13, power limited cable. UL 70,000 BTU flame and tray test, comparable to IEEE 383 flame test. Meets NEC Article 725. Recognized under the components program of Underwriters' Laboratories, Inc. UL Styles 2464, 80°C-300 Volts. Passes VW-1 Vertical flame test. CSA TR-64 approval, OSHA acceptable. Surface printed.

Multi-Paired Individually Alumylar™ Shielded Cable

70,000 B.T.U. VW-1 OSHA NEC

22 AWG stranded tinned copper conductors, insulated with color-coded PVC. **Shield:** Alumylar™ shield over each pair with stranded tinned copper drain wire. **Jacket:** PVC. **Temperature Range:** 105°C. **Voltage Rating:** 300 volts. Suitable as tray cable for Class II and III circuits. UL subject 13, Power-Limited Circuit Cable. UL 70,000 BTU Flame and Tray Test. Meets NEC Article 725, 105°C, 300V. Recognized under the components program of Underwriters' Laboratories, Inc. UL Style 2464, 80°C-300V. Passes VW-1 Vertical Flame Test. CSA TR-64 Approval. OSHA Acceptable. **Color Code:** Pairs are color-coded black and red. On multi-paired cable, each pair is numbered.

Braided Copper Cable — *NEW* —

Conductors: Strands are soft-drawn tinned copper. **Construction:** Strands are woven into a tubular braid and rolled flat. **Features and Applications:** For bonding, straps, grounding or connecting moving parts. Recommended for high current use. **Approvals:** QQ-W-343, Type S, Class S, 1T ASTM-B-33.

ICO-FLEX Expandable Sleeving

- ► Lightweight
- ► Flexible
- ► Easy To Install
- ► Abrasion Resistant
- ► Removable For Repair
- ► Flame Retardant

ICO-FLEX is a lightweight, self-fitting, polyester, monofilament sleeving, designed to encapsulate and protect cable bundles and wire assemblies. ICO-FLEX expandable sleeving adjusts to irregular surfaces and contours providing abrasion resistance and protection with a minimum of bulk and weight. Sleeving is marked with Flame Retardant Identification tracers.

HIX Irradiated Flexible Polyolefin

HIX is the most popular, general purpose heat-shrinkable tubing used for insulating, jacketing, bundling, and identification. It is mechanically tough, will not cold flow, never melts, and will not split when shrunk over sharp or irregularly shaped objects. **Applicable Specifications:** MIL-I-23053B/5, Classes 1, 2; AMS 3636B, AMS 3637B. **Operating Temperature Range:** –55°C to 135°C (–67°F to 275°F). **Shrink Ratio:** 2 to 1 (50%). **Shrink Temperature:** 121°C (250°F).

High Temperature Lead Wire

Type TGGT — UL Style 5251, CSA Type C3; 250°C, 600 Volts

► **UL Listed and CSA**

Flexible, stranded, 10% nickel-plated copper conductor. Teflon® (TFE) tape wrapped, ceramic tape insulation. Teflon impregnated glass braid jacket (tan), optional colors available on request. The ceramic tape insulation combines high dielectric strength with excellent flexibility and ease of stripping to achieve a lead wire of superior resistance to high temperatures, abrasion, chemicals and moisture. For internal wiring of heating equipment and heat producing appliances in domestic, industrial and cooking applications. **Nominal Thicknesses. TFE Tape:** All sizes .015". **Insulation:** 24-8 AWG .010", 6-4/0 AWG .015". **Jacket:** 24-08 AWG .005", 6-2 AWG .0075", 1-4/0 AWG .010".

Type MG — UL Style 5107; 450°C, 600 Volts

► **UL Listed, CSA Applied For**

Flexible, stranded, 27% nickel-plated copper conductor. Glass reinforced mica tapes insulation. Glass braid jacket impregnated with high temperature finisher (tan), optional colors available on request. Superior resistance to high temperature and the effects of radiation, insulating materials retain their integrity after exposure to 10^{12} Roentgens of radiation. For wiring in ovens and other high temperature equipment where temperatures do not exceed 450°C. **Nominal Thicknesses. Insulation:** 24-8 AWG .025",10-4 AWG .030", 2-4/0 AWG .035". **Jacket:** 22-12 AWG .007", 10-4 AWG .015", 2-4/0 AWG .020".

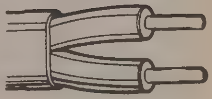
Thermocouple Wire and Extension Wire



A thermocouple is made by the joining together of two dissimilar metal conductors. When the temperature changes at the joint between the two conductors, a voltage is generated. By transmitting that voltage to a special meter, those temperature changes may be monitored and, if desired, recorded. This process is most useful in process instrumentation where monitoring is essential.

ISA Standards

Retractile Cords

Unshielded Neoprene Jacket Power Cords

- ► Retracted Lengths 1, 2 and 4 Feet
- ► Extended Lengths 5, 10 and 20 Feet

Long-lasting service is assured with this quality multiconductor power cord. Each conductor is stranded copper, with rubber insulation, and a rugged weather and oil resistant neoprene jacket overall. Used on electric tools, portable drills, soldering irons; electrical appliances, household appliances, etc., to eliminate loose hanging wires and to prevent wires from tangling and twisting. **Suggested Operating Temperature:** –20°C to +60°C. **Conductor Color Code:** 1 — Black; 2 — White; 3 — Green; 4 — Red.

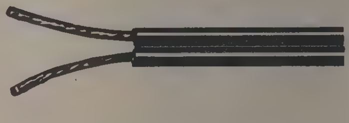
Lamp Cord/Speaker Cable



Speaker Cable

For use in High Definition Speaker Systems, provides a cable with low capacitance and allows it to be used with all amplifiers as opposed to other specialized high capacitance speaker wires, which cause high frequency oscillation in amplifiers.

Lamp Cord

Stranded bare copper conductors. UL Class II 60°C type VW-1 flame retardant PVC, rip type construction for easy separation of conductors, one conductor ribbed for polarity i.d., surface printed with manufacturer's UL identifying code and wire gage. **Applications.** For use with fans, lamps, hanging fixtures, radios, TV sets, stereo and HiFi, small appliances and other applications. **Packaging.** All SPT-1 and SPT-2 wires available on bulk reels.

Computer Cables — Type CM

For your Computer requirements. U.L. style 2464 (300 V) CSA S-R PVC. Available in both single conductors and twisted pairs. Both are 24 gauge (7 × 32), tinned copper, vinyl insulated, overall aluminum mylar shield, 24 AWG stranded tinned copper drain wire, and chrome vinyl jacket. Passes the VW-1 (FR-1) vertical flame test.

Multi-Paired Overall Shielded Cables Type CL2

ULAWM Style 2448 and UL 2919. Passes VW-1 (FR-1) vertical flame test. **Temperature Rating:** –20°C to +60°C. Twisted pairs of polyethylene insulated 24 AWG, seven strand tinned conductors, cabled with overall aluminum/mylar shield with 22 (7) AWG tinned copper drain wire. Jacketed with flame retardant gray PVC, .032" nominal wall thickness. Nominal mutual capacitance 12.5 pF/FT.

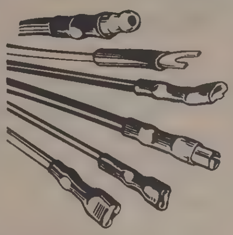
FP Heat-Shrinkable Tubing



FP221 Irradiated Polyolefin (M23053/5)
FP221 is a general purpose heat-shrinkable tubing. Its features are flexibility, flame retardant, self extinguishing and fungus proof. This tubing has a max. shrink rate of 50% of supplied diameter. **Operating Temperature:** –55°C to +135°C. **Colors Available:** 1 — Black, 2 — Red, 3 — White, 4 — Clear. Insert the color number where N appears in the stock number.

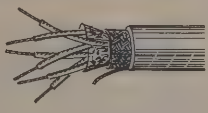
Multi-Pair Computer Cable



- **Suitable for RS-422 Type Application**
- **24 Gage, Stranded Conductors (7 × 32)**
- **UL Classified CM**

Tinned copper, polyethylene insulated twisted pairs, 100% foil and 90% T.C. braid shield and drain wire with chrome PVC jacket. 30 V. **Temperature Range:** –20°C to +80°C. **Nominal Impedance:** 100. **Nominal Velocity of Property:** 66%. **Nominal Capacitance:** 15.5 pF/ft. between conductors; 27.5 pF/ft. between one conductor and other conductor connected to shield.

Overall Shielded Paired Cable

- **UL Subject 13**
- **UL Listed, 300 V and UL 2464 AWM**
- **CSA Certified, CSA TR-64 Appliance Wiring Material**

Tinned copper, vinyl insulation, conductors cabled, overall aluminum mylar shield and drain wire, chrome vinyl jacket. **Color Code:** conductor pairs are color coded black and red. Multipairs are numbered at one inch intervals. Meets Article 725 of the NEC. Also marked as Tray Cable suitable for class 2 and 3 circuits. Passes the UL 70,000 BTU Flame and Tray Cable test which is comparable to the IEEE 383 Flame Test, Sunlight Resistant. Passes the VW1 vertical flame test.

22 AWG (7 × 30)

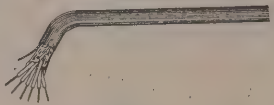
Enduro III Outdoor and Direct Burial



Foil Shield 16 AWG, 19/29

- High Tensile/Tear Strength
- Superior Abrasion/Cut-Through Resistance
- Excellent OutdoOr Aging Characteristics
- Excellent Resistance To Most Oils, Solvents, Fuels and Water
- Fungus Resistant Per MIL-STD-810C
- Passes UL VW-1 Flame Test
- Ultraviolet Light Stabilized (Color Black Recommended)
- Operating Temperature Range: –20°C To 80°C
- Low Temperature Flexibility To –20°C
- Insulation Thickness: .017"
- Jacket Material: Polyethylene
- Jacket Colors: Black and Gray (Other Colors Available)

Enduro IV Computer and Control

Foil and Braid Shield 22 AWG, 7/30, 300 V

- UL Conductor Style 1888, UL20237 and UL20238 Power Limited Tray Cable, 300 V, 90°C
- Stranded Tin Coated Copper Conductor
- Passes IEEE Flame Test
- Color Coded Insulation, 125°C Thermoplastic Rubber
- Nylon Rip Cord For Ease Of Jacket Stripping
- Insulation Jacket Thickness: .016"
- Jacket Material: Thermoplastic Rubber
- Jacket Colors: Black and Gray (Other Colors Available)

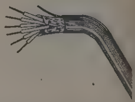
Enduro V High Temperature/ Low Smoke Control



Foil Shield 18 AWG, 7/28

- UL Cable Style 20229, 300 V
- Outstanding Moisture, Abrasion and Impact Resistance
- Passes Steiner Tunnel Test (Low Smoke and Flame Generation)
- Passes IEEE-383, 210,000 BTU Flame Test
- Excellent Chemical, Oil, Solvent and Fungus Resistance
- Low Coefficient Of Friction
- Reduced Cable Diameters
- Direct Burial In Wet Earth Without Conduit
- Operating Temperature Range: –80°C To 200°C (UL, 150°C)
- Insulation Thickness: .010"
- Jacket Material: FEP Teflon
- Jacket Color: Natural Tan

Double Loop, Heavy Duty

3M cable ties secure wire bundles, harnesses and components quickly, without slipping. The self-locking head with heavy double teeth on the one-piece lock mechanism assures the 3M reliability you've come to expect. Molded from 6/6 nylon, 3M cable ties are designed to meet a wide range of temperatures from –140°F (–40°C) to 185°F (85°C). They are available in a variety of sizes and styles and weather-resistant black nylon for outdoor use. Our cable ties are UL Recognized. UL File No.E116841.

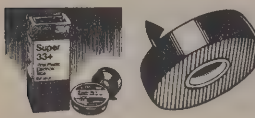
Vinyl Electrical Tapes

Scotch® Super 33+ Premium Vinyl Electrical Tape



Typical Applications
- **Primary Insulation for Splices Up to 600 V**
- **Protective Jacketing**

Super 33+ is highly conformable in all weather applications; resists UV rays, abrasion, corrosion, alkalies and acids. Flame retardant UL listed. CSA certified. **Tape Thickness:** 7 mil. **Temperature Rating:** 105°C/220°F.

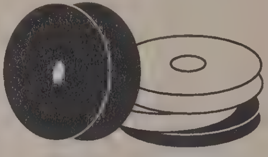
617-4725. 33+. 3/4" × 66'. Black .... **PER ROLL 3.67**
617-4730. 33+. 3/4" × 20'. Black .... **PER ROLL 1.43**

Scotch® Super 88 Premium Vinyl Electrical Tape

Typical Applications
- **Primary Insulation for Splices Up to 600 V**
- **Protective Jacketing**

All weather, heavy-duty, abrasion resistant; fast build up. UL listed. CSA certified. **Tape Thickness:** 8.5 mil. **Temperature Rating:** 105°C/220°F.
617-4735. 88. 3/4" × 66'. Black .... **PER ROLL 4.14**

Scotch™ 35 Vinyl Electrical/Color Coding Tape



Typical Applications
- **Phase Identification and Marking**
- **Harnessing**

35 Tape comes in 9 fade resistant colors, excellent insulating properties. Resists UV rays, abrasion, corrosion, alkalies, and acid. **Tape Thickness:** 7 mil. **Temperature Rating:** 105°C/220°F.

3M Professional Quality Electrical Tape Kit for Color Coding

Kit consists of five rolls (1/2" × 6 2/3 yds.) of Scotch™ 35 Vinyl Electrical Tape. **Five Colors:** Blue, green, red, yellow and white.
617-1045. 10457 .... **PER PACK 6.60**

Highland™ Vinyl Electrical Tape

Typical Applications
- **Protective Jacketing**
- **Harnessing**

Flexible, conformable, general purpose vinyl. UL listed and flame retardant. **Tape Thickness:** 7 mil. **Temperature Rating:** 80°C/176°F.
617-4920. 16720. Highland. 3/4" × 66' .... **PER ROLL 1.67**

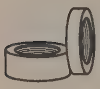
Tem Flex™ Series Tapes

Typical Applications
- **Protective Jacketing**
- **Harnessing**

1700 Vinyl Electrical Tape. Economy-grade, general purpose vinyl electrical tape. 7-mil tape that is UL listed and CSA certified for 176°F and 80°C.
617-4736. 1700. 3/4" × 60' .... **PER ROLL .67**

Highland™ Cloth Duct Tape

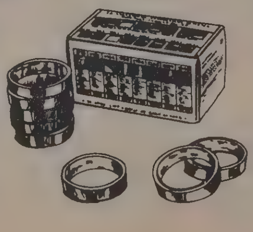
— NEW —



High performance duct tape, excellent adhesion, tears easily. **Color**: Silver. **Tape Thickness:** 10.8 mil. **Temperature Rating:** 93°C/200°F. Used for moisture proofing, plumbing, duct sealing and protecting.

617-6969. 6969. 2" × 60 yds. .... **PER ROLL 8.64**

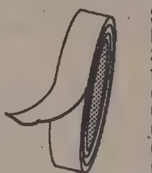
Engineering Kit for Foil Shielding Tapes



This kit is a unique new way to have a variety of foil shielding tapes conveniently at hand for design or prototype needs. **Kit Contains:** Eight rolls — 1170, 1181, 1182, 1183, 1190, 1194, 1245, 1267 and 1345; each is 3/4" by 4 yds. The compact dispenser box (4 × 7.5") serves as a desktop reference with basic technical information on each tape including product number, backing and adhesive type and thickness, adhesion, resistance, and shielding effectiveness.

617-4721. Foil Tape Kit .... **EACH 49.95**

Electrical Tapes for Splicing and Terminating



Scotch™ 130C Linerless Rubber Splicing Tape

High-voltage insulating; thermally conductive; self-bonding. **Tape Thickness:** 30 mil. **Temperature Rating**: 90°C/194°F (continuous), 130°C/266°F (short-term). **Typical Application:** Primary electrical insulation for splicing all solid dielectric cables through 69 KV.

617-0130. 130C. 1" × 30' .... **PER ROLL 10.36**
617-0131. 130C. 1 1/2" × 30' .... **PER ROLL 15.76**

Tem Flex™ 1755 Cotton Friction Tape

Typical Applications
- **Abrasion Protection for Splices and Connections**

High grade friction tape. Good abrasion resistance. **Temperature Rating:** 80°C/76°F. **Tape Thickness:** 15 mil.
617-1755. 1755. 3/4" × 60 .... **PER ROLL 1.95**

Tem Flex™ 2150 Rubber Splicing Tape

Typical Applications
- **Insulating Wire Splices, Split Bolt Connections, and Motor Leads Up to 600 V**

Economical, low voltage rubber insulating tape; self-fusing, UL rated. **Tape Thickness**: 30 mil. **Temperature Rating:** 80°C/176°F.
617-1756. 2150. 3/4" × 22 .... **PER ROLL 3.84**

Scotch™ 70 Self-Fusing Silicone Tape

Arc and track resistant; self-fusing, long lasting silicone rubber. **Tape Thickness:** 12 mil. **Temperature Rating:** 180°C/356°F. **Typical Application**: Protective overwrap for terminating high voltage cables.
617-4737. 70. 1" × 30' .... **PER ROLL 27.90**

Scotch™ 27 and 69 Glass Cloth Tapes

Woven insulating glass cloth; high temperature resistance; high mechanical strength. **Typical Application:** Heat stable insulation for furnace and oven controls, motor leads and switches.
27. Tape Thickness: 7 mil. **Class B Temperature Rating:** 130°C/266°F.
617-4921. 27. 1/2" × 66' .... **PER ROLL 7.62**
617-4922. 27. 3/4" × 66' .... **PER ROLL 11.30**
69. Tape Thickness: 7.5 mil. **Class H Temperature Rating:** 180°C/356°F.
617-4923. 69. 1/2" × 66' .... **PER ROLL 9.74**
617-4924. 69. 3/4" × 66' .... **PER ROLL 14.60**

Electrical Sealing Tape

Scotch™ 2228 Rubber Mastic Tape

Self-fusing rubber based compound bonded to a moisture sealing mastic; all weather. **Tape Thickness:** 65 mil. **Temperature Rating:** 90°C/194°F (emergency overload of 130°C/266°F). **Typical Application:** Insulate, pad and seal bar and splice connections.
617-4742. 2228. 2" × 10' .... **PER ROLL 17.28**

Scotch™ Brand Lane Marking Tape

— NEW —

- **Cost Effective — Outlasts Many Other Marking Materials**
- **Vivid, Contrasting Colors for Coding and Identification**
- **Colors That Comply With OSHA Standards**
- **Excellent Color Retention Because of "Color-Throughout" Backing and Protected Safety Stripes**
- **Heat Resistant to 180°F**
- **Ready Conformability to Irregular Shapes**
- **Resists Abrasion, Moisture, Weathering and Most Solvents**
- **Provides a Sharp Paint Line for Critical Masking Applications**
- **A Tight Effective Seal Against Air and Moisture**
- **Clean and Easy Removal**
- **Roll Length: 36 Yards**

*A-20 is a firm acrylic pressure sensitive adhesive system. It features high ultimate bond strength, very good high temperature and solvent resistance and very high shear holding power. Bond strength increases substantially with natural aging.

Double Coated Vinyl Foam Tapes — *NEW* —

These products are designed for general purpose mounting and joining. The high degree of conformability of these tapes make them ideal for joining many rough irregular surfaces, and the closed-cell foam can make good water and air seals in certain applications. **Ideal Temperature Range:** 70°F to 100°F.

Stock No.	Mfr.'s Type	Tape Thickness	Roll Size	Adhesive Type*	EACH

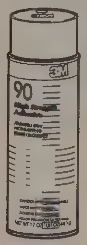
Spray 80



Spray 90

General Purpose Spray Adhesive 201

- ► Aggressive Adhesive for Bonding Many Lightweight Materials
- ► Low VOC
- ► Non-Flammable
- ► Advanced Water-Based Formula with High Adhesive and Temperature Performance

201 is a general purpose aerosol spray adhesive which is waterborne and non-flammable.

617-5303. Spray 201 .... **EACH 12.32**

Low Mist Super 77 Spray Adhesive

- ► High Coverage
- ► Versatile — Securely Bonds Most Lightweight Materials
- ► Low Soak-In for Long Lasting Bonds
- ► Fast, Aggressive Tack
- ► Long Bonding Range
- ► Meets Performance Requirements of MMM-A-1058A
- ► 12 Cans Per Case

617-5300. Spray 77. 24 oz. Aerosol .... **PER CASE 93.78**

80 Neoprene Contact Adhesive

- ► Neoprene-Based Contact
- ► Plasticizer Resistance
- ► High Temperature Resistance to 200°F
- ► Fast Drying: Fast Bonding
- ► Nonmisting — Precise Spray Control
- ► Durable — High Strength Adhesive
- ► Meets Physical Requirements of MIL-A-24179A and MMM-A-130 B
- ► 12 Cans Per Case

617-5301. Spray 80. 24 oz .... **PER CASE 128.99**

90 High Strength Adhesive

- ► High Contact Bond Strength
- ► One-Minute Dry Time
- ► High Temperature Resistance
- ► Nonmisting — Precise Spray Control
- ► Variable Width Spray Pattern
- ► Meets Performance Requirements of MMM-A-130 B
- ► 12 Cans Per Case

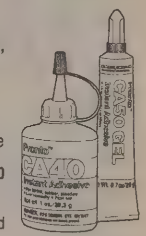
Pronto™ Instant Adhesives — *NEW* —



- ► **Adhesives Cure at Room Temperature**
- ► **Used to Bond a Variety of Substrates Including Most Rubber, Plastics, and Metal**
- ► **Economical to Use; Requires Only Drops of Adhesive to Provide Strong Bonds to Most Metals, Plastics, and Rubbers**

Pronto™ Instant Adhesives are one component, high strength cyanoacrylate adhesives.

CA-8

Rapid setting adhesive. Excellent for metals, plastics, and rubber. Produces bonds with more shock resistance than most cyanoacrylate adhesives. Meets Mil-A-46050C Type II Class 2.

617-5307. CA-8. 1 oz. bottle .... **EACH 11.10**

CA-40H

Fast setting adhesive. Bonds well to difficult substrates, such as aluminum, EPDM rubber, and flexible vinyl. Meets MIL-A-46050C Type II Class 3.

617-5308. CA-40H. 1 oz. bottle .... **EACH 11.10**

CA-50 Gel

Surface insensitive, gel cyanoacrylate adhesive. Very slow cure rate allows maximum time to reposition parts. Provides a gel consistency that doesn't sag. Can be used on vertical surfaces.

617-0150. CA-50. 20 gram tube .... **EACH 13.28**

Low Static Polyimide Film Tape (Solvent Cleaning) — *NEW* —

A translucent, polyimide film-backed silicone adhesive tape with unique and extremely low electrostatic discharge properties. For gold tab protection during wave soldering of printed circuit boards. **Features:** Polyimide film, silicone adhesive, low static. **Roll Length:** 36 yds.

617-5419. 5419 (1/2") .... **PER ROLL 19.91**

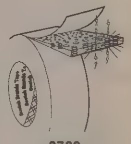
Scotch™ Adhesive Transfer Tape

9703

Scotch 9703 Conductive Adhesive Transfer Tape is an effective time-saving, cost-reducing product for use in numerous electronics assembly applications. It features anisotropic electrical conductivity, i.e. conductivity only through the adhesive thickness and not along the plane of the tape. Moreover, for bond performance you can depend on, it offers consistent caliper and high ultimate bond strength with moderate high temperature performance. And bond strength increases substantially with natural or accelerated aging.



9703

9882

- ► **Fully-Cured Acrylic Pressure Sensitive Adhesive**

Say "yes" to new Scotch brand Thermally Conductive Adhesive Transfer Tapes and you get an advanced alternative for thermal management in electronics bonding and assembly.

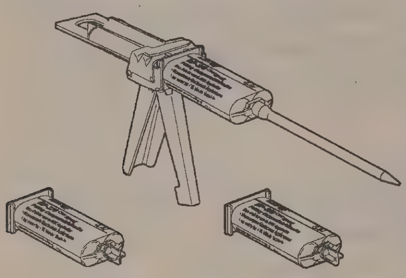
ScotchWeld™ Adhesive System



The Scotch-Weld EPX Applicator System is a fast, convenient way to simultaneously meter, mix and apply two-component adhesives and potting compounds. The system features handy Duo-Pak cartridges that snap quickly into the durable, lightweight EPX applicator. For dispensing, a slight squeeze on the trigger advances the plunger into the cartridge. You're assured of accurate measurement and the mixing nozzle provides thorough mixing and precise placement of material. It's the ideal system for assembly, maintenance and in-field service. Now to meet the specialized needs of the electronics industry, 3M offers three unique new two-part epoxy formulations in Duo-Pak cartridges. These Scotch-Weld products are electrolytically noncorrosive to copper — a vital consideration where long-term reliability of electronic components is a factor.

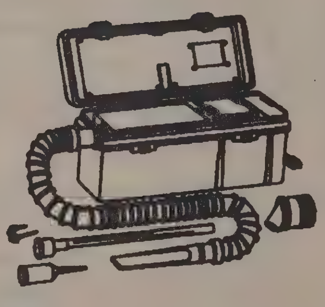
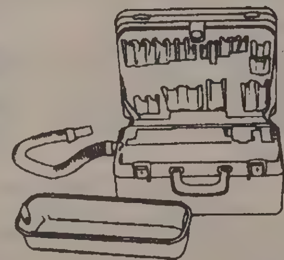
Electronics Vacuum Cleaners, and Filters

► **3 Year Warranty**

Features

- ► **Stretch Hose — The Stretch Hose Extends from 32" to Seven Feet Long. Long Enough to Reach Into Large Machines Without Lifting the Vacuum, Yet Compact for Easy Storage.**
- ► **Disposable Filters — A Choice of Two Conveniently Disposable Filters to Fit Your Specific Applications.**
- ► **Roomy Storage Compartment for Attachments — Attachments and Power Cord are Easily Stored Inside the Cover and Held Securely in Place With an Internal Door.**
- ► **Replaceable 1 HP Motor — A Replaceable One-Horsepower Motor Gives You All the Cleaning Power You Need and is Easy to Service.**
- ► **Strong Resilient Case — High Impact Plastic Case is Tough All Over for Years of Hard Work.**
- ► **Two Durable Latches — Two Sturdy Latches Keep the Lid On Tight and the Attachments Inside During Transit.**
- ► **Current-Limiting Attachments — Technician Safety is Increased Because 3M's Current-Limiting Attachments, Which Include a Crevice Tool, a Wand to Reach Hard-to-Get-at-Places and a Brush to Loosen Toner and Dust Particles.**
- ► **Detachable Power Cord — Power Cord is Detachable for Effortless Storage.**





The 3M Service Vacuum Cleaner, the professionals' choice, is a powerful unit developed for high efficiency cleanup of most business equipment. Designed to be easier to use than ever, this portable vacuum makes even difficult jobs a breeze. And with a high-quality filtration system and advanced safety features, it's the only service vacuum designed specifically with the professionals' needs in mind. Convenience, quality and safety make the 3M Service Vacuum Cleaner far and away the professionals' choice for cleaning office equipment. Transporting the 3M Service Vacuum Cleaner is easier, too. A replaceable handle, two replaceable latches and new hinges mean it travels well. The case is made of high impact plastic, so it's tough on the job or on the road. The new 3M Service Vacuum Cleaner features a hose assembly, wand and crevice tool made with a new plastic that slows down the flow of electricity and drains away static, dramatically reducing potential for shock. These important current-limiting features help to protect customer engineers from the potential danger of contact with electrical power and the annoyance of electrostatic discharge (ESD). They also reduce the risk of shock damage to sensitive electronic components.

Specifications. Electrical: 115 VAC, 50/60 Hz, 5.0 amps. **Dimensions:** Length — 17.80" (45.2cm); Width — 7.75" (19.7cm); Height — 9.25" (23.5cm); Weight — 9 lbs., 14 oz. **Certification:** U.L. listed, CSA listed. **Motor:** Continuous duty rated with one sealed ball bearing and one sleeve bearing lubricated for life. Thermally protected with automatic reset. Conducted RFI filtered (reduces EMI to be below FCC requirements). Comes complete with hose, 32" - 10 ft., wand, crevice tool, crevice tool brush, dusting brush, needle nozzle, 3 year warranty.
Tool Case Vacuum: The Tool Case Vacuum comes with pallet for tools. Comes with: 25"-10" stretch hose, wand, crevice tool, creative tool brush, dusting brush and needle nozzle. Three year warranty.

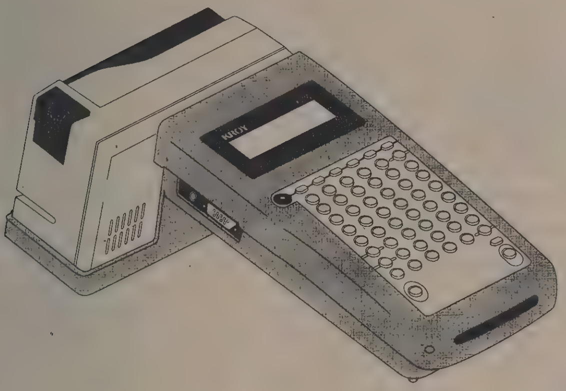
K2000 and New K2500
The "All In One" Industrial Labeling System



- **Prints From 6 to 72 Point Alpha/Numeric Legends on Industrial Laminate Tape Cartridge Supply and Repeats (1-999)**
- **Eight Resident BARCODES, RS232 Port for Scanner Wand, Computer Generated Labels and PCMCIA Interface Card Slot for Custom Programs; K2500 Provides 2 Dimensional Bar Code PDF-417 and MSI-PLESSEY**
- **Prints on Heat Shrink Tubing with Either Alpha/Numeric Legends, Bar Codes or Both for Easy Wire/Cable Identification**
- **No Smear Thermal Transfer Technology**
- **K2000 Has Six Resident Languages: English, Spanish, French, German, Italian and Portuguese; K2500 Adds Dutch, Danish, Swedish, Norwegian and Finnish**
- **$\frac{1}{4}$", $\frac{3}{8}$" And $\frac{1}{2}$" Tubing Meets MIL-I-23053/5 Class 3 Specifications**
- **K2500 Has Time and Date Real Clock and Annunciator Feature Plus Increased Memory Up to 600 K**

Portable labeler prints .5", .8" and 1" labels. 203 dpi (dots per inch) thermal transfer resolution with resident typestyle corresponds to Helvetica. **Resident Barcode Symbologies:** 3 of 9, 12, of 5, 128, UPC-A, UPC-E, EAN 8, EAN 13, CODABAR. **Features Include:** 1 to 6 line printing, 67 scalable type sizes (6 pt-72 pt in 1 pt increments). **Styles:** outline, bold, underline, shadow, frame, italic, mirror, vertical and rotation feature. Left, right or center justification and label format options for margins and label width.

Alpha/numeric sequencing and repeat (1-999). 128 K memory (6000 characters) to save label files. Systems are shipped complete with one black on white (40 ft.) tape supply, 6 ni-cad C-cell batteries, battery charger and owners manual. Optional AC adapter, carrying case and supplies are listed below. Unit measures 4"H × 6"W × 11$\frac{1}{4}$"D. **Weight with Batteries:** 4 lbs.

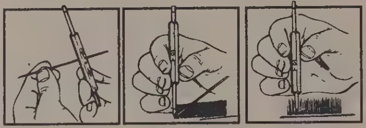
WSU Series Hand Wrapping, Stripping and Unwrapping Tools



Model WSU-30M performs the work of three separate tools. Wraps/unwraps 30 AWG (0.25 mm) wire onto standard .025" (0.6 mm) square DIP socket posts and strips 30 AWG wire nick-free. Makes a "modified style" of wrap, in which approximately 1½ turns of insulated wire are wrapped in addition to the bare wire for added mechanical stability. All metal construction for years of dependable service. Model WSU-30 offers same design, quality, and workmanship but will wrap lengths of stripped wire only.

Stock No.	Mfr.'s Type	Use With	EACH
825-0224	WSU-2224	22-24 AWG on standard .03" × .06" and .045" square posts	32.00

Wire Cut-and-Strip Tools

ST-100

ST-100-24

A revolutionary new concept for easy and clean stripping of wires for wire-wrapping. Easy to operate — place wires (up to 4) in stripping slot with ends extending beyond cutter blades — press tool and pull — wire is cut and stripped to proper "wire-wrapping" length. **Length:** 6.75.

Socket-Wrap I.D. Plastic Panels

Don't get stuck with unmarked pins. Identify pin numbers on wire-wrapping sockets with these socket-sized plastic panels with numbered holes in pin locations. Simply slip on the socket before wrapping to greatly simplify both initial wire-wrapping and troubleshooting or repair. Can also be written on for easy identification of location. IC part numbers, function, etc.

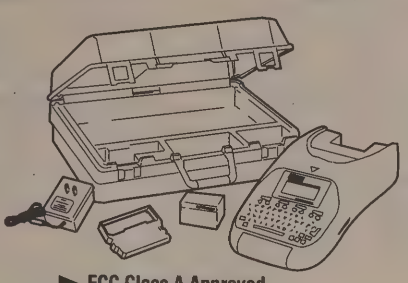
IS951 Identification System

— NEW —

- Unique PCMCIA Slot Expandability
- Full Travel Standard QWERTY Keyboard
- Four Line Liquid Crystal Display (LCD) with Horizontal Scrolling Feature for Up to 32 Characters
- RJ-11 Serial Communications Port
- Can Print Label Widths Up to 2"
- 32 K RAM Expandable 1 MB Via PCMCIA Card
- Rechargeable Nicad Battery System (2400 mA)
- Weight: 7.5 Lbs. (Without Case)
- 1 Year Warranty



- FCC Class A Approved
- UL-Listed AC Adapter

The E-Z-Code® IS951 is a feature-packed, portable labeling system designed to mark and identify practically anything electrical, electronic, or industrial. Us it on any equipment that requires identification, from wires and cables to terminal blocks and rating plates. Label virtually anything from control panels and components to voice and data equipment.

Stock No.	Mfr.'s Type	Description	EACH

*Other types of markers/labels available through special order.

Portable Wire Marker Printer

Internal Ni-Cad batteries require 10-12 hours charging time to print approximately 3 rolls of markers without adapter. 120 VAC, 60 Hz power required for use with adapter. Storage capacity for 100 labels and jobs lists. Can print a directory of entries. Prints up to 16 Alpha, numeric, and special symbols on a single line. Keyboard includes special symbols for marking electrical wires or panel boards. Sequences infinitely. Multiple sequence quantity up to 99, select marker quantity up to 99. Automatic shut-off with recall of last legend. Includes wall adapter, 1 roll of WPR-125A labels, 1 cartridge ribbon, an instruction manual, a marker removal tool and a carrying case for the printer and accessories.

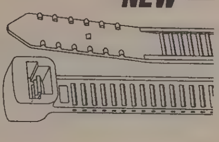
Ty-Fast™ Cable Ties

— NEW —



- ► The Integrally Formed Nylon Pawl Combines Low Insertion and High Locking Strength
- ► A Rounded, Low-Profile Head Makes for Less Snags
- ► Tails Have An Improved Two-Sided Finger Grip Design That Helps the Operator Grasp and Pull Ties Snug
- ► "Sure Grip" Tab Keeps the Tail from Popping Out While Being Threaded, Then Holds It Securely for Final Tightening By Hand or Tool
- ► Quick, Easy Pull Through Increases Productivity, Reduces Operator Fatigue

Designed with OEMs in mind, this new series of competitively priced Ty-Fast cable ties holds down costs and speeds up cable fastening. Our all-nylon design lowers installation costs and provides features to ease fastening for harness fabrication and wire bundling in the manufacturing environment.

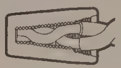
Fixed Spring® Wire Connectors



- ► Five Space Efficient, Color-Coded Sizes
- ► Deep, Wide Connector Entry
- ► Wire Range #22-10 AWG Copper Only
- ► Plated Steel, Square Wire Springs
- ► Flame Retardant Thermoplastic Shells
- ► UL Listed E17010 and CSA Certified LR6541
- ► Rated 105°C (221°F)

For making branch circuit wire or fixture wire connections on numerous combinations of solid and/or stranded copper wire.

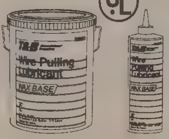
Premium Grade Wire Pulling Lubricant



15-231 15-236

- ► Preferred Wax Base Formulation
- ► Retains Lubricating Properties and Will Not Separate Up to 200°F
- ► Will Not Separate After Frozen
- ► Superior Adherence to Cable
- ► Recommended for Use on All Commonly Used Wire and Cable Including High Voltage Cable
- ► Dries to Slick, Waxy Film
- ► Non-toxic, No Silicones, Non-staining, Easy Clean Up
- ► UL Listed E43782

Fiber Fishing Rod System

- ► Best Combination of Rigidity, Flexibility and Strength Available in Any Fish Tape
- ► Easily Negotiates Multiple Bends, Even in Flexible Conduit
- ► All Non-metallic Construction with High Dielectric Properties, Reduces Personal Hazards Around Hot Circuits
- ► Tighter Bending Radius than Conventional Fish Tapes, Only ¼ the Pulling Effort
- ► Field Repairable If Broken

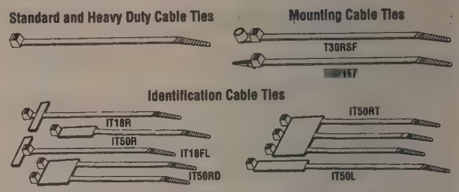
Cable Ties



Tying wire bundles and cables is easy and seconds-fast with these speed binding and harnessing wire ties. Their rounded ends and flexibility enable you to slip them easily under and around cables and harnesses. Gradually tapered tail inserts readily into self-locking head. Uniform serrations along the length of the tie permit easy "pull-through" right down to the wire bundle — ready for final tensioning and cut-off for a neat, tight harness. One-piece molded of self-extinguishing, fungus-inert 6/6 Nylon, the wire tie remains continuously serviceable to 185°F (85°C). There are no loose heads and no metal barbs. Packed in moisture-tight bags of 100 and 1000. Meet all applicable Military Specifications and are QPL listed. Standard color is natural, but ties are available in a variety of colors and materials; including Halar which is approved for use in plenum spaces, radiation and chemical-resistant Tefzel and heat-stabilized black for outdoor applications. Identification cable ties have a large flat area for imprinting or writing the required information.

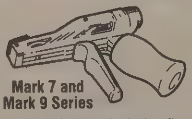
Tensioning Tools

- **Reduce Operator Fatigue and Speed Installation**
- **Quick Infinite Adjustability for Flush Cut-Off**
- **Long Service Life**



Mark 7 and Mark 9 Series

Mark 7. Unique 1" stroke decreases tensioning cycles. Ergonomic design fits operator's hand, while hand grip ensures comfort. Roller bearing mechanism reduces return spring tension for smooth stroke. Lightweight; only 9 1/2 oz. Inner cam knob sets to 3 variable tension levels. Outer cam knob "fine tunes" within the tension ranges. Easy to read digital display speeds adjustment and verification. Durable, high impact, glass reinforced nylon casing. Double-wall linkage for added strength. Tough chromium steel components. Roller bearing mechanism assures low friction between mechanical components. Used to install Tyton ties T18 through T50 series. **Mark 9.** The Mark 9 tool has all the ergonomic design features of the Mark 7, but it can be used to install every Tyton tie, from the T18 Series to the T250 Series. The Mark 9 weighs 11 1/2 ozs. and has a spare blade compartment. **Mark 7HT and Mark 9HT.** Higher tension versions of both the Mark 7 and Mark 9 tools offer the same design features as their standard counterparts but with higher cut-off tension capabilities. **Mark 5.** The Mark 5 tensioning tool is made from a polycarbonate material. It features a short squeeze stroke and a positive cut-off feature which ensures consistently flush, burr-free edges. Can be used to install Tyton ties T18 through T50 Series.

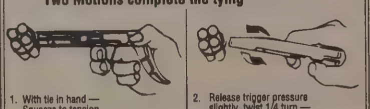
Tytontwyster Cable Tie Tool

The Tytontwyster is a pocket sized, installer controlled, tying tool. Model TWT cuts tail off flush. Made of high visibility, colored, high impact engineering resin. You control the tensioning and cut-off. TWT1 (orange) installs Tyton ties T18 through T50 Series. TWT2 (blue) installs Tyton ties T120 Series.

805-0102. Model TWT1	**EACH 22.33**
805-1296. Model TWT2	**EACH 26.45**

Two Motions complete the tying



1. With tie in hand — Squeeze to tension
2. Release trigger pressure slightly, twist 1/4 turn — then squeeze trigger

Cable Tie Kit

Tyton's cable tie kit contains ties, mounts, and a Tytontwyster Tool in a convenient case. The case is made from a durable polypropylene, and it keeps items in separate compartments for easy access and organization.

Each Kit Contains: 100 18-lb., 4" ties (T18R), 100 18 lb., 5 3/4" ties (T18I), 100 50-lb., 8" ties (T50R), 50 4-way adhesive mounts (MB4A), 1 Tytontwyster Tool (TWT1)

Stainless Steel Clamps and Tool

— NEW —

Tyton's stainless steel clamps are designed to secure hoses, cables, pipes, and more when harsh environmental conditions may adversely affect the clamping application. Used where corrosion, vibration, weathering, radiation, and temperature extremes are a concern, Tyton's stainless steel clamps come in two materials for different applications. **Material 304.** This is the most commonly used material for stainless steel applications. It features the ability to withstand most environmental conditions, particularly in applications where vibration, general weathering, radiation and temperature extremes are a concern. **Material 316.** Material 316 is a highly resistant to corrosion and is widely used in marine environments where chemicals, salts, acids, and high temperatures may affect the clamping application. **Temperature Range:** –112°F to +1000°F (–80°C to +538°C). Tyton's stainless steel clamps and materials should be tested thoroughly under end use conditions to determine suitability for the application.

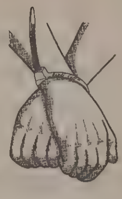
Handi-Cuff Flexible Restraints

Tyton Handi-Cuffs offer you the strength and security you need when using flexible restraints. Features include: Special rounded head which provides extra strength without pinching. Can help prevent nerve damage, carpal tunnel syndrome, and other medical complications. Locking mechanism recessed within head prevents unwanted release. Write-on area for quick identification.



805-1295. Model HC9P2 ....**PER PKG./10 6.20**

Spiral Wrap

A range of Spiral Wrap in four materials for neatly harnessing cables. The range of materials covers all applications and conditions. Spiral Wrap is a versatile form of protection enabling cables to be led out at any point. Furthermore, because of its flexibility, it will follow any route taken by cable. **Spiral Wrap is stocked by Allied in the following material:** Non-flame retarded polyethylene (Spirathene Ref. NFP), **Color:** Natural. **Operating Range:** –76°C to +101°C. Also available on special order in the following materials: P.T.F.E. (Spiratemp Ref. P), **Color:** Natural. **Operating Range:** –68°C to +260°C (300°C for intermittent use). Nylon (Spiralon Ref. N), **Color:** Natural. **Operating Range:** –55°C to +95°C (135°C for intermittent use). Flame retarded polyethylene (Spirathene Ref, FRP), **Color:** White. **Operating Range:** –19°C to +93°C. **Standard Packs:** Spiralon and Spiratemp are supplied in 3 meter lengths, in polyethylene envelopes. Spirathene (flame retarded and non-flame retarded) are supplied in 30 meter lengths, in polyethylene envelopes.

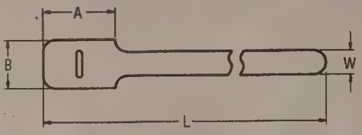
Grip Ties VELCRO* Fasteners

— NEW —



- ► **Manage and Protect Your Cable and Fiber with Tyton Grip Ties**

The Grip Tie is a low profile, one piece fastening device. Constructed of VELCRO* Brand polyethylene hook and nylon loop, laminated back to back, the Grip Tie features quick release for repetitive access to cable and wire. The Grip Tie's design provides ease of installation in tight areas such as telecommunications closets. The tie will also not cause damage to Category 5 cable or fiber optic cable since it cannot be overcinched. **Grip Tie Installation.** Wrap Grip Tie around cable or wire bundle. Insert end through slit and pull to tighten. Wrap remaining length of Grip Tie around itself. **Grip Tie Roll Installation.** Unroll the desired length of Grip Tie and cut. Wrap around wire bundle. Secure remaining length around itself. Since the Grip Tie is self gripping, it is fast and easy to install. Other colors are available, contact Allied for more information.

*VELCRO is a registered trademark for fasteners of the Velcro companies.

Horizontal and Vertical Wire Managers

— NEW —

Both horizontal and vertical cable managers route patch cables, helping eliminate cable clutter on patch panel racks. The cables can be routed on the front and back of racks for patch and station cables. Both the horizontal and vertical wire managers accommodate standard 19" rack mounting and route all types of wire and cable including fiber optic, ScTP, and coaxial cables. The duct is black and features slotted fingers which both route and protect the cable. The duct is double scored so that the duct fingers can easily be bent and broken away when a greater opening is needed. Duct covers are included.

Horizontal Wire Management Brackets

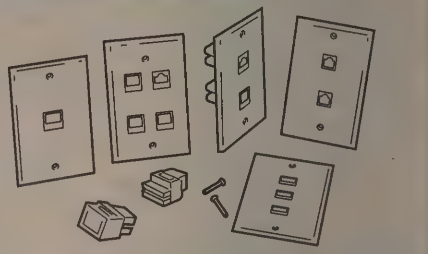
Flush Mount Outlets Category 5 Performance



Tyton's high speed information outlet system offers snap-in inserts and connectors for installation versatility. This design allows outlets to be retrofitted at the workstation, if desired. With choices of single, dual, triple, or quad face plates, ports may be added in the future without making the existing outlet obsolete. Used with the RJ45, 110 block connectors, Tyton information outlets exceed Category 5 requirements. This system is UL and CSA Certified to meet EIA/TIA 568, TSB40-A specification for attenuation, NEXT, and return loss. It provides high performance with all categories of building wiring to 100 Mbps. Printed circuit board technology is used for impedance matched performance. Tyton face plates are manufactured from ABS plastic and meet requirements for UL rated 94V-0.

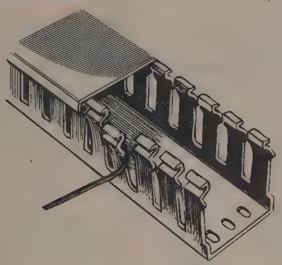
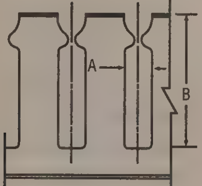
Wiring Duct and Covers





Slotted sidewall style is the popular choice of panel builders. Features restricted slot openings, scored sidewalls for corner and T junctions, breakaway fingers to provide additional access for wire leads, and smooth edges. Buffed edges on slotted wall fingers help prevent worker hand injury during installation and pressure sensitive adhesive backing can be utilized for either temporary positioning or permanent mounting. 1" width duct is provided with 1/2" adhesive strip along centerline. 2", 3" and 4" widths have two 1/2" or 3/4" adhesive strips along their length. Duct must be mounted on a clean, oil-free panel surface. Wiring Duct Covers with their non-slip plastic lining ensure that the covers will remain in place under vibration. Duct and cover sold separately. Packaged 30 feet (carton of 5 6-foot lengths). Manufactured from rigid PVC. UL Recognized, UL Flame Rating of 94V-0, CSA Certified.

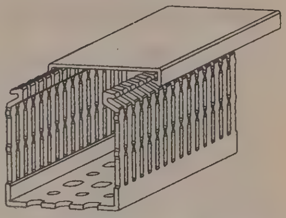
High Density Wiring Duct



- **2 to 1 Finger Ratio**
- **Versatile Mounting Hole Design**
- **Covers Are Flush With the Side of the Duct**
- **Manufactured from Rigid PVC**
- **Duct and Covers Sold Separately in Six Foot Lengths**
- **UL Recognized**
- **CSA Certified**
- **UL Flame Rating of 94V-0**
- **Made in the USA**

Tyton High Density Wiring Duct incorporates many of the features of its standard wiring duct but features narrow slotted wall fingers. These slotted wall fingers equal a 2 to 1 finger ratio compared to standard slotted wiring duct. The narrow fingers reduce the fanning of wires to terminal blocks for a neater appearance and to accommodate more compact designs. Tyton's versatile mounting hole pattern on the high density duct lines up with DIN rail, as well as numerous other mounting designs. Also, the mounting hole rows are consistent with Tyton's standard wiring duct, so the two ducts can easily be interchanged. Tyton's standard wiring duct cover can also be interchanged with the high density duct, eliminating the need to order additional cover inventory. Tyton's high density wiring duct comes with pressure sensitive rubber based adhesive backing. The adhesive backing can be utilized for temporary positions or permanent mounting. **Color:** Gray.

Tyton Rite-On Markers

- **A Special Label Window Holds Label Firm for Easy Marking (Fig. 1)**
- **Can Easily Be Held in the Palm of the Hand to Provide a Flat Writing Surface (Fig. 2)**
- **Label Dispenses Automatically When the Liner Is Pulled from the Front of the Unit (Fig. 3)**
- **Excess Liner Is Easily Cut Off by Tearing It Over the Edge Guide at the Front of the Unit**
- **Easy to Reload, Refills Are Readily Available**
- **Once Reloaded, Unit Allows Minimal Label Exposure to Dust and Moisture**
- **Easily and Conveniently Fits in Shirt or Pants Pocket**

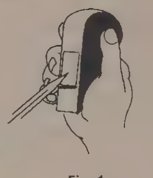

Fig. 1

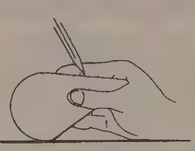

Fig. 2

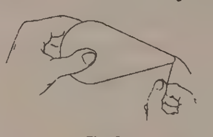

Fig. 3

Tyton Rite-On markers are self-laminating markers in different sizes which allow for efficient wire and cable identification. The labels have a clear tail which overwraps the legend for protection and longevity of the information. The Rite-On markers come with a reusable dispenser made from high impact yellow plastic which is resistant to oils and grease. The dispenser can be reloaded over and over again, making it a cost-effective and efficient method of labeling. Once reloaded, the unit allows minimal label exposure to dust and moisture. And the dispenser easily fits in a shirt of pants pocket. Non-smear marking pens are also available, helping ensure easy-to-read labeling.

Self-Laminating Labels

Rite-on marker dispensers are loaded with self-laminating labels. These labels have a clear tail which seals the legend under clear vinyl.

Refill Rolls for Self-Laminating Labels

Tyton provides refill rolls of self-laminating labels for use in the Rite-On dispensers. Refill rolls reduce the cost of using Rite-On markers, as the plastic dispenser can be reused. In addition to being cost effective, using refill rolls is an environmentally sound way to label, as waste is reduced. Each refill box is marked with the size and part number for easy reference and can be used with point-of-purchase displays.

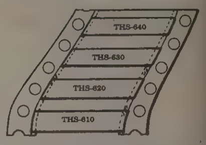
Shrink-Tag Markers



Shrink-Tag markers are a heat shrinkable marking system which provides permanent, solvent-resistant identification for wires, wire harness products, terminals, and other components. Pin-fed Shrink Tag can be efficiently marked with Tyton Tagprint labeling software, an IBM compatible computer, and most printers. Marks can also be made with a typewriter or pen. Manufactured from flexible polyolefin, self-extinguishing, Shrink-Tag can be used in a temperature range of –22°C to 220°C and is recognized to UL standard 224 for print performance, heat shock, and flammability. Shrink-Tag has a 2.0 inch printable marker width and a shrink ratio of 3 to 1. All sizes are available in yellow or white and are packaged on a spool for easy handling. This product meets MIL-S-85848/1 and MIL-M-81531 for print performance. Tyton Shrink-Tags can also be printed using Tyton's thermal transfer printer.

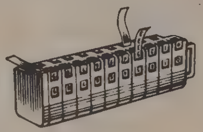
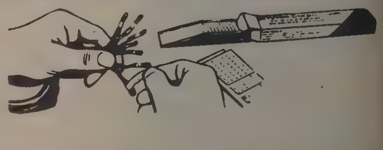
Tyton Wire Marker Tape



The Tyton Wire Marker Tape Dispenser provides a convenient economical system for wire marking. Sharp, crisp legends are coated to resist smearing and abrasion. The Wire Marker Tape is provided on a carrier strip to prevent contamination of the adhesive prior to dispensing for installation. This assures permanent non-flagging marker ends. **Dimensions:** 1/4" wide × 1 1/4" long. **Markers Per Roll:** 76 each legend. **Adhesive:** Aggressive acrylic base. **Marker Material:** Dupont Tyvek — This is polyolefin material that resists tearing and abrasion.

WMTD0-9. One wire marker tape dispenser with 10 rolls of markers — 1 roll each of 0-9 legends.
805-0751. Type WMTD0-9 .... **EACH 21.15**
WMT0-9. Single box of wire marker tape refill — 1 roll each of 0-9 legends.
805-0760. Type WMT0-9 .... **EACH 17.53**
Note: One roll per box. Other legends available upon request.

Handi-Cards Pressure Sensitive Wire Markers



Tyton Handi-Cards are easy release markers on a plastic car. They feature a strong adhesive which assures a long lasting bond on wire. Permanent pre-printed legends are available in solid or sequence order.

Sequence Handi-Cards. Each marker on the card contains a different number or letter. It runs in sequence beginning with the lowest number or letter first, and ending with the highest.

The Labels — *NEW* —

Tyton provides several types of labels in a range of sizes and materials for wire and component marking. Tyton provides a combination of ribbon and material that produces a chemical and solvent resistance, non-smear mark, that is clean and legible. Both self-laminating labels for use with wires, and blank polyester labels, for component and product marking, are featured in this system. **Topcoat:** Specially formulated for superb ink anchorage. **Liner:** 80#. **Temperature Range:** –50°F to +200°F (–46°C to +93°C). **Adhesive:** Permanent pressure sensitive acrylic. **Application:** For wires and cable and other conformable surfaces.

Tyton Thermal Transfer Ribbons

Tyton thermal transfer ribbons are specifically designed for use with Tyton thermal transfer materials. Due to various settings in printers, the different label types and variations in ribbons, each material must have its own specific ribbon. For instance, when ordering Tyton 822 material labels, you must specify and use the ribbon that is configured for the 822 stock. In this case it would be the TT822 ribbon. In addition, you must use this ribbon if you want an Underwriters Laboratories recognized on the 822 material. Call Allied for more information on blank labels.

Tagprint Labeling Software

Tyton Corporation offers two versions of Tagprint labeling software for efficient computer generated labeling. Tagprint for Windows and Tagprint II are both ideal for creating labels for wire and cable marking, PC boards and components, terminal blocks, and almost any industrial identification application. Tagprint for Windows and Tagprint II are IBM compatible. Both versions of Tagprint can be used with dot matrix and laser printers, as well as Tyton's TT1000 thermal transfer printer. Call Allied for more information on Tyton's thermal transfer labeling system, which incorporates Tagprint software. Easy to use, Tyton's software speeds production, while offering many labeling options. Bar coding, serialization, label sets, and text choices are just some of the capabilities of Tyton's Tagprint software.

Tagprint for Windows Labeling Software

Tagprint for Windows provides many features for labeling versatility and efficiency. **WYSIWYG:** "What You See Is What You Get" label creation. The label is shown on the screen for easy editing and proofing. Graphic images appear, as well as representations of type styles, sizes and placement. **Preview:** View a sheet of labels at one time. **Serial Numbers:** Alpha and numeric options include decimal, octal, and hexadecimal capabilities. Most serial configurations increment automatically. Custom options are available to meet special requirements. **Random Access:** Allows easy data entry for labels that have different information on each label. **Graphics:** Windows-created graphics can be printed. **Bar Codes:** Code 39, Interleaved 2/5, UPC-A, and EAN standard bar codes are offered. All bar code dimensions can be altered to fit on various sized labels and printed with or without text. High density bar codes with sharp, clear imaging can be produced when using a laser printer or Tyton's TT1000 thermal transfer printer. **Fonts:** Uses the Window true type fonts for a wide choice of sizes. **Label Sets:** Prints multiple sets for group repetition. **External Field:** Separate ASCII data bases can be accessed. Both fixed and free formats are read. **Time/Date Functions:** If desired, Tagprint for Windows prints time and date of label printing. Time and date are continually updated during the printing process, so there is no need to stop for changes. **Complete Storage Capacity:** Once a label is created, it can be stored in any directory or file and is automatically sorted for easy recall. **Printers:** Prints to laser and dot matrix printers, along with Tyton's TT1000 thermal transfer printer. **Unlimited Label Stock Sizes:** All standard Tabtag label sizes appear on Tagprint for Windows, but non-standard sizes can easily be added to the label data base. **Customer Support:** The software comes with a user's manual and toll-free number for friendly, knowledgeable customer support. **Requirements:** IBM PC, PS/2 or compatible with at least a 286 microprocessor. Microsoft DOS 3.3 or higher and Microsoft Windows 3.1 or later. IBM VGA or other graphic adapter supported by Windows. Mouse supported by Windows. At least 4 MB of RAM. At least 2 MB of free space on the local hard disk. A 3.5" disk drive for installation. A printer with device driver for Windows 3.1. A 368 or 486 processor is preferred.

805-7500. TPSWIN50 ....**EACH 408.00**

Note: Windows is a trademark of Microsoft Corporation. Microsoft, MS, and MS-DOS are registered trademarks of Microsoft Corporation. IBM is a registered trademark of International Business Machines Corporation.

Tagprint II Labeling Software

Like Tagprint for Windows, Tagprint II software offers labeling efficiency and versatility. Tagprint II runs on any IBM compatible computer with DOS 2.1 or later. Easy to use, no prior computer experience is needed to create, save, and store label files. As in Tagprint for Windows, Tagprint II offers: WYSIWYG ("What You See Is What You Get") Label Creation, Graphics, Label Sets, External Field, Time/Date Functions, Complete Storage Capacity, Unlimited Label Stock Sizes and Customer Support. Tagprint II also provides other features. **Serial Numbers:** Alpha and numeric options include decimal and hexadecimal capabilities. Most serial configurations increment automatically. Custom options are available to meet special requirements. **Bar Codes:** Five bar codes are offered on Tagprint II, including Code 39, Interleaved 2/5, UPC, Codabar, and EAN standard. All bar code dimensions can be altered to fit on various sized labels and printed with or without text. High density bar codes with sharp, clear imaging can be produced when using a laser printer or Tyton's TT1000 thermal transfer printer. **Various Text Sizes:** Six standard sizes can be printed, from 5 characters per inch (c.p.i.) to 17 c.p.i. With the smaller text sizes, greater amounts of information can be placed on the small labels. Larger text sized can make the label readable from a distance. **Automatic Centering:** Inputted information is automatically centered on the Tabtag label. Information can also be moved to very specific coordinates on the label. **Mouse Support:** Tagprint II can be used with or without a mouse. **Printers:** Prints to laser and dot matrix printers, along with Tyton's TT1000 thermal transfer printer.

Tabtag and Handi-Labels Computer Printable Labels

Tabtag Labels

Computer-printable Tabtag labels are available in self-laminating and blank styles for nearly any labeling application. Self-laminating Tabtags are manufactured with a clear, flexible vinyl film which overwraps the legend to provide protection against moisture, chemicals, and abrasion. Blank Tabtags are used to flag wire and cable and identify terminal blocks, printed circuit boards, E-Proms, ICs and other components. Used for bar coding and other industrial identification purposes, Tabtags resist harsh chemicals and extreme temperatures, while providing smudge-resistant identification. Additional stock sizes are available, and custom labels can be designed to meet specific requirements. Standard label color is white.

Handi-Labels

Tyton now offers Handi Cards for computer printing using Tagprint software. **Label Dimensions:** .235" W × 1.5" L, 32 labels across the pages. Each section of labels is perforated so that it can be separated into individual cards after printing. This makes it possible to print custom legends on a standard Handi-Card size product. Handi-Labels come in packages of 2500 markers. The material is a white, conformable vinyl with a rubber based, permanent adhesive. **Temperature Range:** –40°F (40°C) to +175°F (347°C).

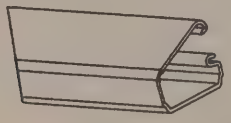
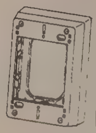
Surface Raceway

Shape Electronics offers a full line of Wiremold® plastic surface raceway to simplify any new or existing wiring or cabling job. Wiremold raceway systems are ideal for smoke detectors, burglar alarms, fire alarms, additional receptacles and switches, ceiling fans, telecommunication systems or computer networking. These systems offer a flexible organized method to run power or data cabling over walls or on the floor and most models can be painted to match the surroundings. Adhesive backing speeds installation and snap-on fittings provide easy access for changes or future additions. Wiremold raceway protects electrical wiring for a safer installation.

Uniduct™ Ivory 1 Piece Raceway



Uniduct



Device Box

Uniduct is a single piece latching raceway designed to secure and protect low-voltage (50 volts or less) wires and communication cables. The easy open and snap-close flexible hinge allows for quick installations and changes.

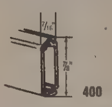
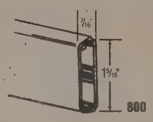
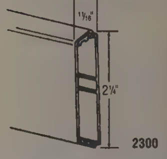
2 Piece Ivory Raceway Base and Cover



400



800



2300

The Two Piece raceway systems are constructed of rigid PVC that resists impact and corrosion and are UL and CSA listed for applications up to 300 volts. Three sizes to choose, simply mount the base, run the wire and snap on the cover.

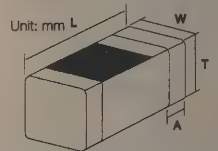
Type LL1608F



For reflow soldering. **Inductance Range:** 1.2-100 µH. **Temperature Coefficient:** +250 ppm/°C. **Temperature Range:** –40°C + 100°C. **Features:** Laminated ceramic allows high SRF. **Miniature Size:** 1.6 mm × 0.8 mm. **Q:** 30 Typical (at 800 Hz). **IDC mA (Max.):** 300. Stocked in packs.

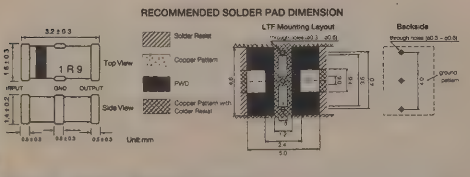
Chip Low Pass Filter



Type LTF. Features Miniature Footprint: 3.2 × 1.6 mm (1206). Low profile (1.4 mm). **Carrier Frequency Range:** 800 MHz-2.6 GHz. Suitable for flow and reflow soldering. **Operating Temperature Range:** –25°C to +80°C. **Storage Temperature Range:** –40°C to +85°C.

SMB Product Facts

- SMB Offers Snap-Fit Coupling for Quick Connect/Disconnect
- Choice of Commercial or MIL-Type Connectors
- 50 and 75 Ohm MIL-Type Connectors Available
- Screw Machined Components for Highest Performance
- Straight Plugs and Jacks are Completely Crimp Terminated
- Fast Easy Cable Assembly
- Low VSWR
- Standard Military, Commercial or AMP Tooling
- MIL-Type Connectors Offer Consistent Mating and Unmating Forces
- Dielectric: Teflon

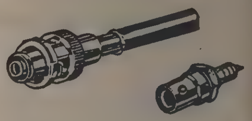
SHV Connectors



Safe-tested at 5000 volts DC. Looks like, but isn't intermateable with other bayonet-type connectors. Comply with Bureau of Standard's specification ND-545. Polarized center contacts that are recessed in the dielectric. **Crimp Type:** D.

Coaxial Connectors

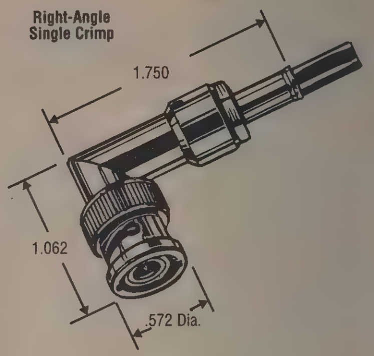
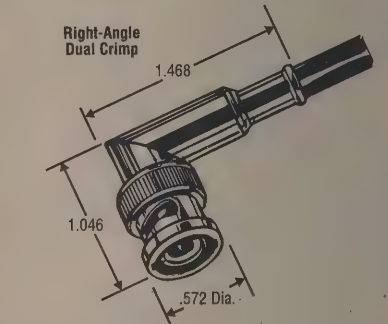
AMP® BNC RF connectors have bayonet-lock coupling. AMP's exclusive single and dual crimp terminations insure positive insulation grip and require absolutely no soldering. They provide termination at the lowest overall applied cost. **Rating:** 500 volts (RMS). **Frequency:** 0-2.5 GHz for single crimp; 0-2 GHz for 75 ohm; 0-4 GHz for all others. **Style:** Mil type or commercial (Com.). **Crimping tools for the connectors can be located on page 1038.**





BNC Right Angle Plugs (50 or 75 Ohms)

Standard single (S), dual (D), and hex (H) crimp termination plugs. Contact plating is gold (G). Body plating is nickel (N). The dielectric is polymethylpenlene (PM) or teflon® (T).

— NEW —

Consumer Series BNC Plugs

► **Plating — Contact - Gold; Body - Nickel; Dielectric — Thermoplastic**

New low-cost alternative to AMP's full line of commercial and military-style BNC connectors. The sleek, lightweight plastic collars come in black, red, green, blue and computer grey for easy circuit identification without any additional assembly. Fully intermateable with standard BNC jacks.

Coaxial Connectors

AMP® BNC RF connectors have bayonet-lock coupling. AMP's exclusive single and dual crimp terminations insure positive insulation grip and require absolutely no soldering. They provide termination at the lowest overall applied cost. **Rating:** 500 volts (RMS). **Frequency:** 0-2.5 GHz for single crimp; 0-2 GHz for 75 ohm; 0-4 GHz for all others. **Style:** Mil Type or Commercial (Com.). **Crimping tools for the connectors are listed on page 1038.**

BNC 50 or 75 Ohm, Straight Crimp Plugs

Standard single (S), dual (D), and hex (H) crimp termination plugs. Contact plating is gold (G), silver (S), or tin (T). Body plating is nickel (N) or silver (S). The dielectric is polyethylene (PE), polymethylpenlene (PM), polypropylene (PP) or teflon® (T).

75 Ohm BNC Straight Plugs

These connectors can be used in a variety of applications where true 75 ohm performance is needed to insure lower signal distortion. They may be matched with standard 50 ohm BNC without damage or intermittence.

BNC Clamp Type Plugs, Standard and Taper Grip

Regular clamp types use a five piece construction while taper grip styles are of three piece design and require little cable preparation. Both types tightly clamp the shield to the connector body. Soldering on the contact pin is required. All materials are machined brass with gold contacts.

Color Coded BNC Bulkhead Jacks

In addition to Bomar's white Valox isolated bulkhead jack, three new versions are available with a red, green, and blue insulated panel bushing and the matching color internal insulator. These are excellent for RGB interconnect applications — instantly color codes your panel ports. For panel thicknesses up to .125 inch. Special colors available with minimum order requirements.

BNC Adapters and *"The Goalie"*

The internal design offers the lowest possible reflected signal (VSWR) and guarantees no oxidation at the internal contact points as the connector ages. *"The Goalie"* is rated at 3 GHz with a VSWR of 1.12:1.

Connectors For Twinax Cables

Standard Twinax connectors are impedance matched for 100 ohm cables and are used extensively with IBM computer systems. BNC *Satconn Twin* is a crimp (or solder) plug with a patented design that simplifies assembly and uses a comparatively inexpensive Bomar hand tool. For .242" diameter twinaxial cables.

Printed Circuit Board BNC Jacks

These popular BNC board jacks meet or exceed the highest industry standards. They are available in many standard configurations as shown. Additional versions are available upon request. All isolated jacks are constructed with molded Valox, in White or Black, over nickel plated zinc bodies. Contacts are Phosphor Bronze and plated with tin or gold. All metal versions are fully shielded. They are nickel plated zinc and utilize the same phosphor bronze contacts in either tin or gold plating.

Between Series Adapters solve a variety of connection problems where connectors of different types could ordinarily not be mated together. Each adapter has a different type coupling at each end allowing for a wide variety of interconnections to fit almost all interconnection situations. All adapters are constructed of machined brass and are nickel plated.

M/A-COM Between-Series Coaxial Transmission Line Adapters provide convenient transitions between all popular series coaxial connectors. The adapter design provides a minimum length consistent with good electrical performance. The small, low VSWR, and broad frequency coverage permits a wide range of applications in both measurement and systems use. All dielectrics are TFE fluorocarbon. The center contacts are made of beryllium copper, gold plated.

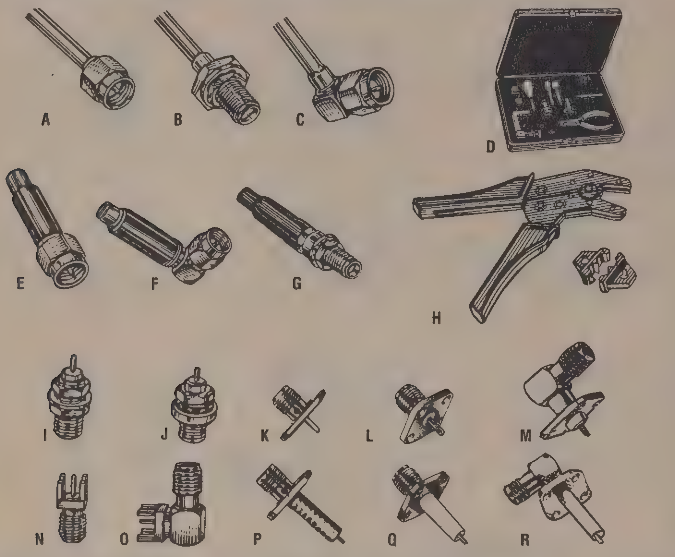
SMA Series Coaxial Plug and Jack Connectors



All SMA miniature connectors meet or exceed requirements of MIL-C-39012. Part number suffix-02 indicates passivated stainless steel finish, while part number suffix-00 indicates gold plated finish.

OSX Subminiature Snap-On Connectors

- ► 30% Smaller Mated Height Than SMB
- ► Improved Force to Engage/Disengage
- ► Snap-On Interface
- ► Broadband Frequency (DC-6 GHz)

OSX subminiature snap-on connectors are an excellent blend of size, weight, durability and performance for applications such as GPS, automotive, and wireless communications.

K Connectors

— NEW —

Anritsu Wiltron

- Excellent Performance Up to 46 GHz
- Performance Exceeding SMA Below 18 GHz
- Superior Reliability
- Compatibility with SMA, and 3.5 mm
- Familiar Assembly Procedures
- Complete Testability on Existing Network Analyzers

The K connector is a reliable, 2.92 mm device that operated up to 46 GHz and outperforms an SMA connector below 18 GHz. It is compatible with SMA, and 3.5 mm connectors and is assembled using procedures that are similar to those used on SMA. It is well suited to applications in components, systems, or instrumentation.

Coaxial Adapters

The K220 series of precision adapters enables accurate measurement with K connectors. Every adapter is fully specified and 100% tested to ensure low refection and optimum performance over the DC to 60 GHz range. **Specifications. Frequency Range (GHz):** DC to 40. **SWR:** 1.22. **Material:** Outer conductor and body — stainless steel per ASTM A484/A582, passivated per QQ-P-35; Center conductor — BECU per QQ-C-530, gold plate per MIL-G-45204. **Electrical:** Frequency range — .01-40 GHz; Pin depth — .000 to -.003.

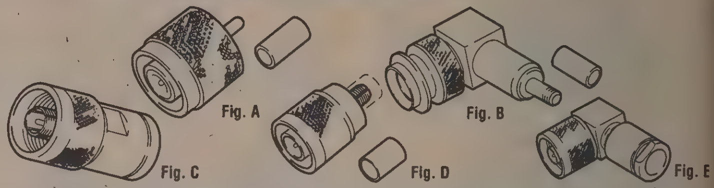
TNC and N Type Coaxial Connectors



Connectors below all have silver or TR-5 plated bodies and silver or gold-plated contacts, except for connectors which are Mil-C-39012, they have silver bodies and gold contacts.

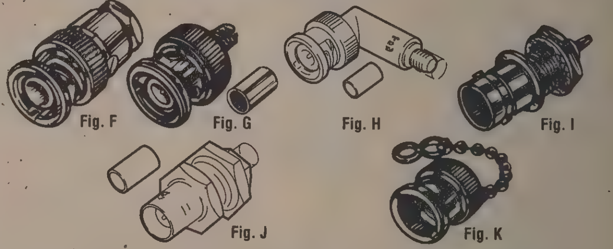
BNC — Miniature Coaxial Connectors



These connectors are rated at 500 Volt RMS. **Frequency Range:** 0-4 GHz. **Impedance:** 50 Ohm except for the 75 Ohm impedance listings. Silver-plated bodies are finished with TR-4® chromate treatment to resist tarnish and salt spray. The rest are finished with TR-5® electro-deposited plating that has superior resistance to tarnish and corrosion.

Motorola RF Power MOSFETs are constructed using a planar process to enhance manufacturing repeatability. They are N-Channel field effect transistors with an oxide insulated gate which controls vertical current flow. Compared with bipolar transistors, RF Power FETs exhibit higher gain, higher input impedance, enhanced thermal stability and lower noise. The FETs listed in this section are specified for operation in RF Power Amplifiers and are grouped by frequency range of operation and type of application. Arrangement within each group is first by order of voltage then by increasing output power.

RF Power MOSFET (Continued)

To 150 MHz HF/SSB

Motorola's broad line of bipolar RF power transistors are characterized for operation in RF power amplifiers. Typical applications are in military and commercial landmobile, avionics and marine radio transmitters. Groupings are by frequency band and type of application. Within each group, the arrangement of devices is by major supply voltage rating, then in the order of increasing output power. All devices are NPN polarity except where otherwise noted.

HF Transistors

14-30 MHz, CB/Amateur Band
V_{CC}=12.5 or 13.6 Volts, Class AB
For economical, high volume use in CW, AM and SSB applications.

Mfr.'s Type	P_{out} Output Power (W)	P_{in} (Max) Input Power (W)	G_{PE} (Min.) Gain* dB	Ø$_{JC}$ °C/W	Package Style

RF Small Signal Transistors

In small signal RF applications, the package style is often determined by the end application or circuit construction technique. To aid the circuit designer in device selection, the Motorola broad range of RF small signal amplifier transistors is organized by package type. These devices are NPN polarity unless otherwise designated.

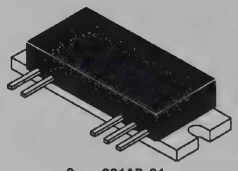
RF Amplifiers

High Power

Complete amplifiers with 50 ohm in/out impedances are available for a variety of applications including land mobile radios, base stations, TV transmitters and other uses requiring large-signal amplification, both linear and Class C.



Case 301AB-01
Style 1

Land Mobile/Portable

The advantages of small size, reproducibility and overall lower cost become more pronounced with increasing frequency of operation. These amplifiers offer a wide range in power levels and gain, with guaranteed performance specifications for bandwidth, stability and ruggedness.

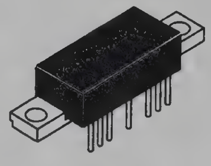
Low Power

The following categories describe a wide range of complete amplifier assemblies both hybrid and monolithic for use in CATV distribution systems, instrumentation, communications and military equipment. A variety of power levels and frequencies of operation is offered for many applications



Case 714G
Style 1

CATV Distribution

Motorola Hybrids are manufactured using fourth generation technology which has set new standards for CATV system performance and reliability. These hybrids have been optimized to provide premium performance in all CATV systems up to 152 channels.

40-860 MHz Hybrids, V_{CC}=24 Vdc, Class A
Conventional Hybrids

Mfr.'s Type	Hybrid Gain (Nom.) dB	Channel Loading Capacity	Maximum Distortion Specifications						Noise Figure Typ. dB		Package Style
			Output Level dBmV	2nd Order Test dB	Composite Triple Beat dB		Cross Modulation dB		@ 750 (MHz)	@ 860 (MHz)	
					110 CH	128 CH	110 CH	128 CH			
MHW7142	14	110	+40	–60	–62	—	–66	—	—	7.5*	714/1

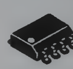
RF Monolithic Integrated Circuits



Case 751
(SO-8)

Case 751B
(SO-16)

To 1.8 GHz

For DECT and JPHP, the MRFIC1801 through MRFIC1804 device series offers complete transmit and receive functions, less Lo and filters, for typical 1.8 GHz cordless telephone. The chip set is also applicable in other 1.9 GHz and 2.4 GHz personal communications systems.

Antenna Switch — SO-8

Mfr.'s Type	Operating Freq. Range (GHz)	Supply Volt. Range (Vdc)	Supply Current TX Mode (µA) Typ.	Leakage Current (µA) Typ.	Insertion Loss TX Mode dB Typ.	P_{in}, 1 dB Compression dBm Typ.	Package Style
MRFIC1801	1.5-2.5	2.7-5.5	300	45	0.6	29	751

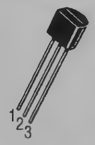
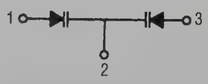
Abrupt Junction Tuning Diodes



Case 29-04
TO-226AA
(TO-92)

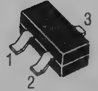


Style 15

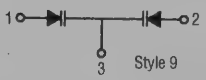
Case 182
TO-226AC
(TO-92)

Style 1

Style 8



Case 318-07
TO-236AB
SOT-23



Style 9

Motorola supplies voltage-variable capacitance diodes serving the entire range of frequencies from HF through UHF. Used in RF receivers and transmitters, they have a variety of applications.

Two families of devices are available: Abrupt Junction and Hyper Abrupt Junction. The Abrupt Junction family includes devices suitable for virtually all tuned-circuit and narrow-range tuning applications throughout the spectrum.

General Purpose Plastic abrupt Tuning Diodes Capacitance Ratio @ 2.0 Volts/30 Volts
Case 182 — TO-226AC (TO-92) — 2-Lead

The following is a listing of plastic package, general-purpose, abrupt tuning diodes. These devices exhibit high Q characteristics.

Mfr.'s Type	C_T @ V_R=4.0 V,1.0 MHz			$V_{R(BR)R}$ (V)	Cap. Ratio C4/C30 Min.	Q 4.0 V, 50 MHz Typ.
	(pF) Min.	(pF) Nominal	(pF) Max.			
MV2101	6.1	6.8	7.5	30	2.5	400
MV2108	24.3	27.0	29.7	30	2.5	250
MV2109	29.7	33.0	36.3	30	2.5	200
MV2111	42.3	47.0	51.7	30	2.5	150
MV2115	90.0	100.0	110.0	30	2.6	100

Abrupt Tuning Diodes for FM Radio — Dual
Case 29-04 — TO-226AA (TO-92)

The following is a listing of abrupt tuning diodes that are available as dual units in a single package.

Mfr.'s Type	C_T @ V_R[2]			Cap Ratio C3/C30 Min.	Q 3.0 V, 50 MHz Min.	$V_{R(BR)R}$ (V)	Device Marking	Style

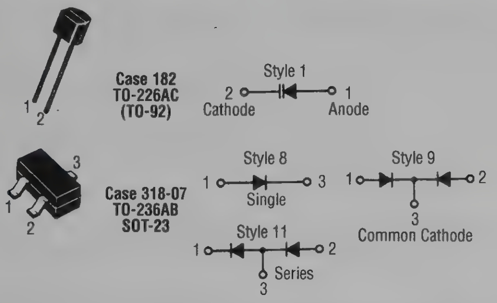
Tuning, Hot-Carrier and Switching Diodes

Hot-Carrier (Schottky) Diodes



Hot-Carrier diodes are ideal for VHF and UHF mixer and detector applications as well as many higher frequency applications. They provide stable electrical characteristics by eliminating the point-contact diode presently used in many applications

Hot-Carrier (Schottky) Diodes

Case 182 — TO-226AC (TO-92)
The following is a listing of hot carrier (Schottky) diodes that exhibit low forward voltage drop for improved circuit efficiency.

Mfr.'s Type	$V_{(BR)R}$ (V)	C_T @ V_R (pF) Max.	V_F @ 10 mA (V) Max.	I_R @ V_R (nA) Max.	Minority Lifetime (ps) Typ.	Device Marking	Style
MBD701	70.0	1.0 @ 20 V	1.0	200 @ 35.0 V	15	—	1
MBD301	30.0	1.5 @ 15 V	0.6	200 @ 25.0 V	15	—	1
MBD101	7.0	1.0 @ 0 V	0.6	250 @ 3.0 V	—	—	1

Case 318-07 — TO-236AB (SOT-23)

Mfr.'s Type	$V_{(BR)R}$ (V)	C_T @ V_R (pF) Max.	V_F @ 10 mA (V) Max.	I_R @ V_R (nA) Max.	Minority Lifetime (ps) Typ.	Device Marking	Style

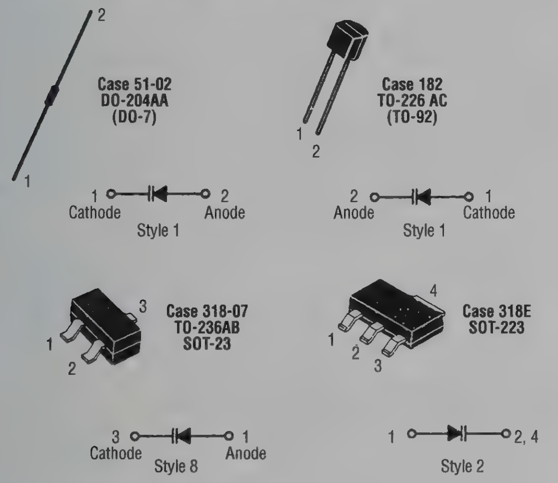
[1] Dual diodes.

Hyper Abrupt Junction Tuning Diodes



Tuning Diodes — Hyper-Abrupt Junction

The Hyper-Abrupt family exhibits higher capacitance, and a much larger capacitance ratio. It is particularly well suited for wider-range application such as AM/FM radio and TV tuning.

Hyper-Abrupt Tuning Diodes For Telecommunications — Single
Case 182 — TO-226AC (TO-92)
The following is a listing of hyper-abrupt tuning diodes intended for high frequency, FM radio, and TV tuner applications.

Mfr.'s Type	C_T @ V_R (f=1.0 MHz)			Cap. Ratio @ V_R			Q		$V_{(BR)R}$ (V)	Device Marking	Case Style
	(pF) Min.	(pF) Max.	(V)	Min.	Max.	(V)	3.0 V Min.	50 MHz Max.

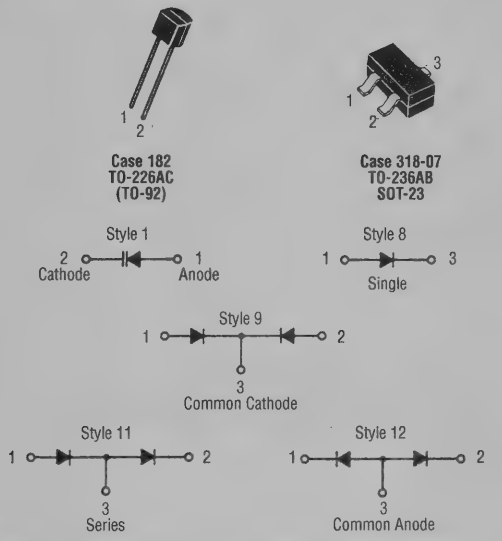
[1] V_R=1.0 V/V_R=9.0 V. [2] V_R=2.0 V/V_R=10 V. [3] V_R=1.0 V, f=1.0 MHz. [4] V_R=2.0 V, f=1.0 MHz.

Switching Diodes



Small-signal switching diodes are intended for low current switching and steering applications. Hot-Carrier, PIN and general-purpose diodes allow a wide selection for specific application requirements.

PIN Switching Diodes

Case 182 — TO-226AC (TO-92)
The following PIN diodes are designed for VHF band switching and general-purpose low current switching applications.

Mfr.'s Type	$V_{(BR)R}$ (V) Min.	C_T @ V_R @ 1.0 MHz		I_R @ V_R (nA) Max.	Series Resistance (Ω) Max.	Device Marking	Style

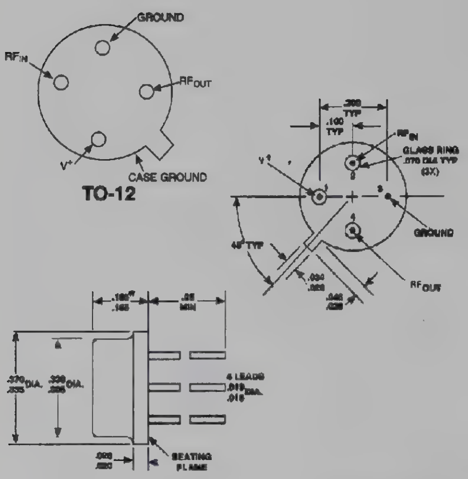
IF/RF Low Cost Cascadable Modules from Avantek

GPD Series Low Cost Amplifiers, TO-12 Package

- **5 to 1000 MHz Frequency Coverage**
- **High Performance-to-Cost Ratio**
- **Ideal for Mixer Post Amplification**



Avantek GPD amplifiers, available in TO-12 (4-pin) packages, are designed for applications which require the highest performance-to-cost ratio or where size is an important factor. Some versions are equipped with internal coupling and bypass capacitors. The GPD Modules are discrete hybrid devices.

Guaranteed specifications at 0°-50°C case temperature, typical values at 25°C.

.086 Electrical Specifications. Connectors: Freq. range is DC-26.5 GHz (SMA); VSWR 1.02+.005X (fGHz). **Insertion Loss (DB Max.):** 03 √fGHz. **RF Leakage:** –(90-fGHz). **Voltage Rating (VRMS Max./Sea Level):** 335. **Cable:** Insertion loss per 100' — 1 GHz, 23 DB; 8 GHz, 72 DB; 18 GHz, 117 DB; 26.5 GHz, 148 DB max. **Power Handling (CW/Sea Level):** 1 GHz — 130; 8 GHz — 34; 18 GHz — 22; 26.5 GHz — 15. **Max. Impedance**: 50 ohms ±2 ohms.

.086 Mechanical Specifications. Connectors: SMA anti-torque plug. **Finish:** Passivated stainless steel coupling nut, soldered, surface — gold plated. **Contact:** Gold plated beryllium copper. **Interface:** MIL-STD-348A, stainless steel coupling nut. **Recommended Mating Force:** 3-5 in.-lbs. **Cable:** Center conductor; silver plated copper clad steel, 0.20" normal. **Dielectric PTFE:** .060" normal. **Outer Jacket:** Tinned coated wire braid over copper foil, .083" normal. **Bending:** Per MIL-C-17 .125" minimum inside radius. **Recommended Bending Guidelines:** .125" inside radius — one time maximum; .50" inside radius — ten times maximum. **Connector Retention:** 30 lbs minimum. **Operating Temperature:** –60°C to +105°C unmated connector, –70°C to +200°C cable.

Instrument Repair and Calibration Services

Avnet Industrial provides repair and calibration service for a wide variety of test instrumentation plus factory authorized warranty service for B&K, Triplett, LFE, Simpson and Yokogawa. Certificates of calibration traceable to N.I.S.T. are also available. Call Avnet Industrial for additional capabilities not listed below and for calibration outside the listed capabilities: 1(800) 332-3423. All repairs are calibrated to original manufacturers' specifications and include a 90 day warranty.

Factory Authorized Warranty Center for

- B&K
- LFE (API)
- Simpson
- Triplett
- Yokogawa

Calibration Capabilities

- **Direct Volts** - 10nV to 30KV, Best Accuracy 20PPM (100uV to 1KV)
- **Direct Current** - 1uA to 500A, Best Accuracy 100PPM (100uA to 10A)
- **DC Ratio** - 0.0000001 to 1000000, Best Accuracy 1PPM (0.010000 to 100.0000)
- **Resistance** - 1 Micro Ohm to 1 Giga Ohm, Best Accuracy 20PPM (1 Ohm to 1 Mega Ohm)
- **Alternating Volts** - 1uV to 30KV, Best Accuracy 0.01% (1mV to 1KV, 50 to 5khz)
- **AC Power** - 1W/VAR to 5KW/VAR, Best Accuracy 0.5% (100W/VAR to 1KW/VAR, 50-5khz)
- **Alternating Current** - 1uA to 500A, Best Accuracy 0.02% (100uA to 10A, 50 to 5khz)
- **Phase Angle/Power Factor** - 0 to 90°, Best Accuracy ±1° (50, 60 and 400Hz)
- **AC Ratio** - 0.01:1 to 1:1, Best Accuracy 200PPM (50 to 1khz)
- **AC Impedance** - 1 Milli Ohm to 1 Mega Ohm, Best Accuracy 0.05% (50 to 1khz)
- **Frequency** - DC to 500mhz, Best Accuracy 1 x 60-12 (at 0.1, 1, 5, and 10MHz)

We Repair and Calibrate

- Oscillators and Generators; Signal, Function and Waveform
- Semiconductor and Vacuum Tube Testers, Curve Tracers
- Multimeters
- Clamp-On Ammeters
- Insulation Testers; Megohmeters and High Potential Testers
- Power Systems Analyzers and Monitors
- Temperature Indicators
- Multifunction and Process Instrument Calibrators
- Lab Standards; Voltmeters, Ammeters, Wattmeters, etc.
- Resistance Standards; Decade Boxes, RTD Simulators
- Wheatstone and Kelvin Bridges
- Industrial Tachometers, Rate and Speed Indicators
- Halogen Leak Detectors
- Oscilloscopes, Real Time and Digital Storage
- Frequency Counters and Counters/Timers
- Chart recorders, Data Loggers

Also Available

- Certification Traceable to N.I.S.T.,
  With or Without Data
- Certificates of Calibration
